❧ *A unique
counter prescription
from
Trentham Laboratories*

Secron[❧] for children's colds

Formulated to fill an important market gap amongst counter products – about 9 million children between the ages of two and twelve, most of whom find nasal sprays and drops unacceptable.

Secron is a pleasant tasting syrup with proven therapeutic value*... but unlike other systemic decongestants, Secron contains no antihistamine.

*Phenylpropanolamine, Guaiphenesin.

Customers (and coughs and colds) **come in all shapes and sizes**

That's why we make a variety of pastilles — not just Meggezones "the strong one" for the heavy bout of catarrh, but also MiniMeggezones for less serious attacks and Junior Meggezones, in lemon and orange flavours, for the children.

Blue Special Pastilles in a 7 variety range **suit your customers**

Cherry Cough, warming and comforting; Glycerin of Thymol, a gargle in pastille form; Smokies for that irritating smoker's cough; the tastier, smoother Glycerin Lemon & Honey and Glycerin & Blackcurrant to soothe sore throats; and Catarrh and Menthol & Eucalyptus for the nose.

There's something for everyone in the White Laboratories range — and for you, in our volume discounts.

Working party ready to take evidence

The Linstead working party on pharmaceutical general practice within the NHS is ready to receive evidence—and will not preclude consideration of the "general principle" of a planned service.

The working party, which is to report to the Central NHS (Chemist Contractors) Committee on all aspects of the involvement of pharmacists in general practice in the National Health Service held its first meeting on November 9.

Evidence will be accepted from individuals and organisations upon matters within the terms of reference, but any evidence dealing with the principle of planning the services must be relevant to the body of evidence on the NHS contract.

Those wishing to submit evidence should inform one of the joint secretaries at once. They will then be sent an outline of the form which their evidence should follow (it is set out on p711). Letters should be addressed to the Joint Secretary, Working Party on NHS General Pharmaceutical Services, 17 Bloomsbury Square, London WC1A 2NN.

Fourteen groups of organisations are being invited separately to submit evidence, including Pharmaceutical Committees and branches of the Pharmaceutical Society in England and Wales.

Chemists' sales well up in September

Sales by chemists and photographic retailers were 10 per cent higher in September than in the same period of 1969 according to the Department of Trade and Industry (formerly Board of Trade) monthly returns.

Multiple retailers had the best results, with a 13 per cent increase. Independents were 8 per cent up, and the Co-operatives 3 per cent up on last year.

Indices for the month (1966 average = 100) are:

All chemists	118 (+10)
Independents	113 (+8)
Multiples	125 (+13)
Co-operatives	101 (+3)

The figures do not allow for receipts under the National Health Service.

Acceptance for Noel Hall report

The Government has decided to accept in principle the main recommendations in the report of the Noel Hall working party on the hospital pharmaceutical service.

It now intends to discuss with hospital authorities the consequential organisational changes and to invite the Whitley Councils concerned to discuss salaries and conditions of service for the proposed new staffing structures.

Mr Albert Howells, who in June this year retired from a two-year period of office as president of the Pharmaceutical Society, went to Buckingham Palace on November 10 with Mrs Howells for his investiture as an Officer of the Order of the British Empire. The award was made in the Birthday Honours list

Contractors seek 2.4d for containers

An immediate increase in the container allowance of 2d is being claimed by the Central NHS (Chemist Contractors) Committee.

The Committee is asking for a rate of 2.4d per prescription from November 1, to take into account recent increases in the cost of medicine bottles.

Terms of reference for the Linstead working party were discussed at the Committee's last meeting, and it was said that objections were unlikely to be raised if matters on broader issues were raised.

It was agreed that further joint representations by the Committee and the Pharmaceutical Society be made to the Home Office and the Department of Health for a maximum pack size of 25 or 30 of tablets or capsules covered by the Drugs (Prevention of Misuse) Act, and for a liquid equivalent.

The latest available prescription statistics were received:

Total number of prescriptions	22,623,498
Total value	£15,011,359
Average total cost per prescription	159.25d
Average on-cost (after discounting)	9.70d
Average fee	29.85d

The Committee supported a suggestion from a pharmaceutical committee that drug manufacturers be asked to give a bold declaration on containers of monoamine-oxidase inhibitor preparations, whether branded or generic, that they contained an MAOI.

The committee refused to consider Department of Health proposals relating to amendments to the Drug Tariff list of proprietary preparations with a commonly-used pack size until a satisfactory settlement had been reached on outstanding remuneration claims.

It was decided to give publicity to the rate of payment for providing a rota service on Monday, December 28, which is not to be declared a Bank holiday. The Department of Health had agreed that where, with the agreement of the Executive Council, arrangements were made for contractors to close and an official rota was

	April 1970	April 1969
Total number of prescriptions	22,623,498	20,950,869
Total value	£15,011,359	£12,927,829
Average total cost per prescription	159.25d	148.09d
Average on-cost (after discounting)	9.70d	9.30d
Average fee	29.85d	28.61d

arranged, payment at the rate of 40s could be claimed for the hour.

It was agreed to make representations to the British Medical Association about the difficulties, some serious, encountered when interpreting Forms EC10 written by doctors' receptionists.

'NP' debate on the air

Automatic "NP" labelling received another public airing last week — this time on BBC Radio 4.

In the lunchtime programme "You and yours," Mr A. Aldington, a past-president of the Pharmaceutical Society, and a doctor discussed the subject with an interviewer. Mr Aldington gave the reasons why many pharmacists oppose labelling without a specific instruction from the prescriber — such as the undesirability of neurotic patients knowing they were taking certain types of medicine.

But the doctor wanted to get away from the "black magic" idea of a highly-coloured bottle or capsule. Patients could read a clearly written prescription and "this rather undercuts your case," he claimed. The doctor agreed, however, that his profession should be encouraged to indicate dosage.

Public spent more on medicines during 1969

Average weekly expenditure on medicines and surgical goods rose from 2.41s in 1968 to 2.78s in 1969, according to the Department of Employment and Productivity's Family Expenditure Survey (HM Stationery Office, £2).

In the same period there was an increase in expenditure on toilet requisites, cosmetics, etc., from 5.13s to 5.38s. Spending on optical and photographic goods rose from 1.95s to 2.04s.

The survey is based on records of income and expenditure provided by 7,008 households and the findings are presented in tables showing the average amount spent in a week by each household on commodities and services, classified according to household income, income and composition of household, administration area and the occupation of the head of the household.

Some statistical information from the tables is given on the right. The group headed "Medicines and surgical goods" includes National Health Service charges. "Medical, dental and nursing fees" covers NHS payments to dentists and all private fees.

Special forms for 'misuse' drugs

Ways and means of collecting information on transactions in controlled drugs occupied members of the Government's Standing Committee on the Misuse of Drugs Bill during their second sitting last week.

Several proposals including the setting up of a centralised computer drug information bureau on the Canadian pattern and the Pharmaceutical Society's suggestion of the introduction of triplicate prescription forms were discussed.

Mr R. Sharples (Minister of State, Home Office) said that the Government had concluded that it would be premature to aim for central monitoring. A preliminary study showed that there were definite limits to continuing with the systems of special record keeping and special returns. These were wasteful of manpower and other resources.

A group of amendments he put forward would give the Government power to require the use of forms relating to orders or prescriptions and "to require the 'furnishing of in-

formation' by any party in the producer-consumer chain."

Amendment No. 26 enables regulations to be made requiring the use of special order forms.

No. 27 requires the furnishing of information.

No. 29 requires the prescriptions to be in writing in a certain form and No. 30 "gives power to require information." "If we adopt the idea of prescriptions for controlled drugs having to be written on forms by order, it becomes more simple," concluded Mr Sharples. The committee accepted the series of amendments proposed.

Advertisement 'disfiguring'

The Keswick, Cumberland, chemists, W. Cowen & Son, have lost two appeals against refusal of planning permission by the Lake District Planning Board to allow the display of two illuminated signs at 36 Station Street.

According to a statement by the Ministry of Housing and Local Government there already are several signs on the premises, some of them illuminated, and the new ones would give "an excess of advertisement material which would completely disfigure this prominent building."

A 'poor service' from pharmacy

The present retail pharmacy set-up gives the public a poor service, Mr J. Cave, a retail pharmacist and member of the Socialist Medical Association, told a meeting of the Association on Tuesday.

Pharmacists in health centres would give a better and more economic service, he maintained.

The meeting, on "Pharmacy in the 70's" and held at the House of Commons under the chairmanship of Mr Eric Ogden MP, heard from Professor E. J. Shellard, Chelsea

College, that schools of pharmacy needed to get away from teaching manipulative skills. The pharmacist's role today was to be at the point of distribution of medicines to the public, checking the advisability of giving the medicine on pharmacological grounds. To teach these skills would take more than the three years allowed at present.

Miss E. M. Linton, Association of Pharmacy Technicians, asked that pharmacists in retail should acknowledge publicly the use they made of technicians. She complained that she had been unable to dispense a prescription for a crepe bandage in the absence of a pharmacist — yet could sell one.

Miss Linton also asked for support for the view that dispensing doctors — she held they were necessary in remote rural areas — should employ qualified technicians, not train up their receptionists.

Mr J. W. Hadgraft, Royal Free Hospital, warned that the Noel Hall report was not an unmixed blessing. How it was implemented was important, because it would be possible to create a pharmaceutical bureaucracy remote from the point at which the service was felt by the patient. Nothing should undermine the position of the pharmacist responsible at this point.

Guild invites students

Young pharmacists and students are to be invited to present short papers for discussion at a one-day hospital pharmacy conference arranged by the Guild of Public Pharmacists. The venue is Bedford

College, London, and the date May 22, 1971.

At its November meeting the Guild's council was told of discussions with the Association of British Pharmaceutical Industry on acceptable standards for packaging of whole range of pharmaceuticals for use in hospital. Although it had been agreed that overall standardisation of packs was impracticable, some progress seemed to be possible and Mr Hetherington for the Guild was authorised to try to arrange discussions with the Department of Health and representatives of the British Medical Association on the problems involved.

The Pharmaceutical Whitley Council's sub-committee concerned with the Noel Hall working party report will meet on November 17 to discuss the organisational pattern of the recommendations of the report. It was reported that the staff side were to meet the management side to discuss new superannuation proposals.

A deputation would be meeting the Secretary of State for Health to discuss the draft circular on the implementation of the Zuckerman report on the hospital scientific and technical services.

It was reported that the appointments scheme for undergraduate students seeking pre-registration places in hospital pharmacies was now in operation, but the booklet listing hospital undertakings pre-registration training had been incomplete due to lack of time and unavoidable difficulties.

It was anticipated that the scheme worked out in liaison with the British Pharmaceutical Students Association would be operated in 1971.

Hanbury medallist's lecture

Professor R. B. Woodward was presented with the Hanbury memorial medal by the President of the Pharmaceutical Society on November 4. Later Professor Woodward gave a lecture on "Recent advances in the chemistry of unnatural products" at the School of Pharmacy, Brunswick Square, London WC1, where so many attended the lecture that it had to be relayed by television screens to two other large rooms in the building.

Professor Woodward described the molecules of penicillin and cephalosporin and the synthesis of compounds having similar structures, many of which had no antimicrobial activity. By use of phosphorane compounds condensation products could be prepared that did show marked antimicrobial activity but it "does not seem that we can correlate chemical reactivity of the beta lactam systems with microbiological reactivity."

Professor R. B. Woodward (right) receives the Hanbury medal from Mr W. M. Darling, (see story on left)

'Substitution' case will go ahead

The move to stop Middlesex Pharmaceutical Services committee inquiring into allegations that drugs supplied by a London firm of dispensing chemists were not as prescribed by a doctor (*C&D* October 31, p 607), failed in the High Court last week.

The Queen's Bench Divisional Court dismissed an application by Gordon D. Conway Ltd, trading as Bright's Dispensing Chemists, for an order prohibiting the Committee from proceeding with an inquiry concerning a prescription for Nembutal and one for Indocid.

It had been alleged that one of the prescriptions had been handed in at the company's branch in Church Road, Willesden.

Lord Parker, Lord Chief Justice, Mr Justice Ashworth and Mr Justice Cantley, directed that any hearing should not take place until 28 days after the company had been given information concerning the ingredients of the drugs the company was alleged to have substituted for those prescribed.

Mr Galpin, for Conways, asked for costs against the Committee. Although Conways had been unsuccessful in their application they had succeeded in forcing the Committee to give details of the case to be met. Mr A. G. de Montmorency, for the Committee, resisted the costs application, saying Conways had failed in their claims that the Committee had acted unlawfully and that there had been undue delay. The company had also

not pursued an earlier suggestion that the Committee had, in some way, been linked with *The Sunday Times*. Costs were awarded against Conways.

Giving judgment, Lord Parker said that on November 11, 1969, the Executive Council had received a letter from the Medical Defence Union referring to an allegation by a doctor that a chemist, or chemists, had, on two occasions, supplied drugs which were different from those prescribed.

As a result of that letter the matter was brought before the Council's finance and general purposes committee which might, or might not, have also had before them a letter from a journalist employed by *The Sunday Times* who said he understood a complaint had been made about drug substitution, and named Conways.

Lord Parker said there had been considerable delay, due to a misconception of the law, but in June, 1970, the matter was referred to the Committee for investigation. Delay since then had been due to Conway's solicitors entering into lengthy correspondence with the Committee.

The Court could not accept a submission that it would be a denial of natural justice for

the inquiry to be held now, said Lord Parker. Nor had there been any irregularity on the part of the Council in conducting certain investigations. The Council had been bound to make inquiries before referring the allegations to the Committee.

After giving judgment, Lord Parker told counsel he had deliberately not made any reference to a *Sunday Times* article concerning drug substitution.

Polaroid forced to raise prices

"Irregular" exporting of Polaroid pack films to countries where dealer prices are higher has forced Polaroid (UK) Ltd to raise prices on the British market.

The company say they have tried to keep prices down for several years, but at present dealer prices are below those of other major countries. To some extent this has been necessary due to the high rate of purchase tax in the UK.

Recently, advantage has been taken of the lower prices to export film supplied to the home market. "The considerable volume of these exports must in the long term be detrimental to Britain's export drive and ultimate economy because of their adverse effect on our overseas markets."

Despite changes in conditions of sale and packaging, the exports have continued leaving the company with no alternative but to selectively increase the prices of the Polaroid Land films most affected. There is no change in the price of Polaroid Type 20C Land film used in Swinger cameras.

Remuneration explained

Chemist contractors in England and Wales will next week receive a 16-page booklet explaining how their NHS remuneration is calculated.

Produced by the Central NHS (Chemist Contractors) Committee, it sets out the basis of payment, the method of payment and the working of the cost inquiries from which is derived the "balance sheet" of what is due to contractors and what has actually been paid.

Rural area subsidies are also explained, and appendices set out the rates of subsidy and the discount scales applied to the total net ingredient cost of a contractor's prescriptions.

New Sunday Trading Bill introduced

The Shops (Sunday Trading) Bill introduced in the House of Lords substitutes a new schedule for Schedule 5 to the Shops Act 1950.

It will allow the sale on Sundays of "medicines and medical or surgical appliances" and "toilet requisites including perfume, cosmetics and dentifrices . . . including such goods as are medicated but which are not pharmaceutical preparations."

It also would allow the sale of "photographs and photographic films or plates."

The Bill is intended to be effective on January 1, 1972, but applies only to England and Wales.

Adjournment debate

Miss Mervyn Pike was expected to raise an adjournment debate in the House of Commons on Thursday on "the need for a proper regulation of the reimbursement of pharmacists in the Health Service."

The subject is understood to derive from some of the allegations in the recent *Sunday Times* article.

Limitation of sales of medicines 'would not increase safety'

"I doubt very much whether limiting the sale of simple remedies to pharmacists' shops would significantly increase their safety," said Sir Derrick Dunlop, chairman of the Medicines Commission, in a "pharmaceuticals" supplement to last Monday's edition of *The Times*.

Sir Derrick accepted that seemingly innocuous medicines could be abused, or interact with potent drugs given simultaneously — but he held to his doubt. Simple remedies on the general sale list would be able to be bought, properly labelled, from multiple stores and even slot machines, he said.

[The Medicines Act allows the Ministers to list in a special section medicines which can "with reasonable safety be sold by automatic machines"—Editor.]

Sir Derrick made his points in a discussion with Mr A. Howells, a past-president of the Pharmaceutical Society, Mr S. Day, chairman of the Proprietary Association of Great Britain and Mr A. Smith, vice-president of the Association of the British Pharmaceutical Industry.

Mr Howells pointed to the availability of advice in a pharmacy, but Sir Derrick did not believe that an assistant would warn a purchaser of phenacetin tablets about the possible dangers of long-term use.

'Public will decide'

Mr Day said that the public would decide where they wanted to buy medicines. "They don't buy them like groceries. They know perfectly well what suits their condition. They go outside pharmacies for convenience. It is nothing to do with safety."

In another article in the supplement, Mr E. B. Teesdale, director of the ABPI, gives the following breakdown of the ownership of "branded prescription medicine firms," at present in membership of the Association:

Nationality	Number of firms	Percentage	Market share 1968-69 (pc)
UK	26	36	25
US	25	35	40
Swiss	6	8	13
French	5	7	6
German	4	6	6
Dutch	2	3	1
Italian	2	3	
Swedish	1	1	1
Danish	1	1	

'Unification' of the NHS

Legislation to unify the administration of the National Health Service in England is to be introduced at the same time as alterations are made in the structure of local government, said Sir Keith Joseph, Secretary of State for Social Services, in a written Parliamentary answer last week.

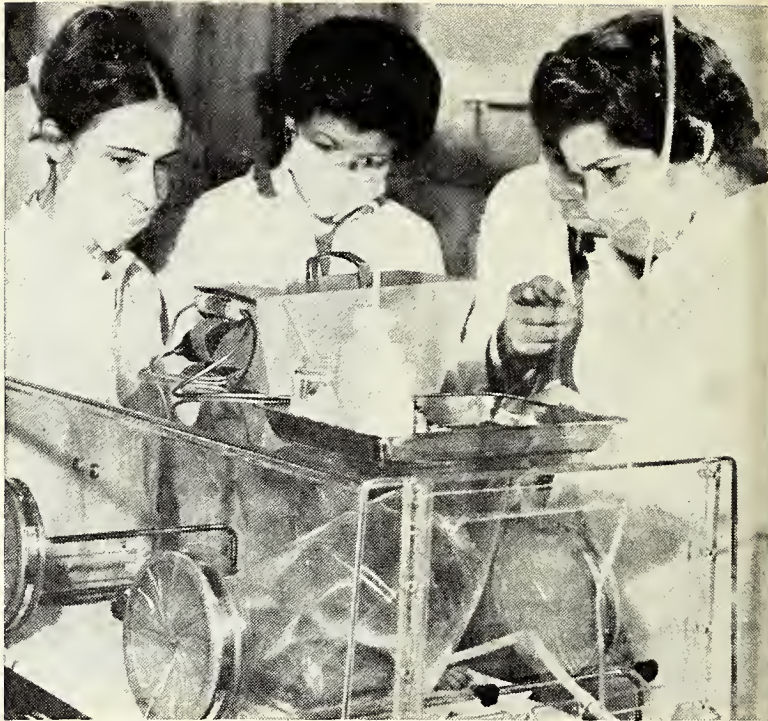

The NHS will be administered by health authorities outside local government working closely with the local authorities responsible for the personal social services and the public health services, he said.

"The Government are not satisfied, however, that the detailed administration proposals in the Green Paper of February 1970 would create an efficient structure of a unified service. They are studying the comments made on the proposals, and, before reaching final decisions of their own, will consult with the organisations concerned."

Asked about the reorganisation of the service in Scotland, Mr Gordon Campbell, Secretary of State, said he had decided that NHS administration should be unified and that the general practitioner, hospital and local health services should be administered by a single health authority in each area.

"I propose that the new authorities should be outside local government, but should have close links with the local authorities responsible for the social work services and environmental health services."

Similar provisions were outlined by Mr Peter Thomas, Secretary of State for Wales.

The Hon Mrs Soames, wife of the British Ambassador to France, recently visited Nancy in Lorraine where she called at several hospitals. Her tour was organised by Laboratoires Glaxo, a subsidiary of Glaxo Group Ltd. This picture, taken at the Nancy Maternity Hospital, shows Mrs Soames, extreme right, taking a keen interest in a neonatal resuscitation unit

Irish news

Hospital pharmacists strike

A four-day strike of hospital pharmacists which brought dispensing and distribution of prescriptions to a standstill, was called off by the Association of Hospital and Public Pharmacists on November 6, pending a meeting between representatives of the Association and the City and County Managers' Association, in the presence of the Minister for Health.

The strike, which affected 900,000 people in the lower-income group, was fully supported by community pharmacists who refused to act on a suggestion that they should supply the requirements of the people affected until the dispute was settled. The reaction of community pharmacists was deplored by the Minister for Health in the Dail but later the Secretary of the Irish Drug Association, Mr B. R. Smith, defended the action of chemists in not acting on the recommendation of the Minister and made it clear that his members would only cater for prescriptions on a cash basis during the strike.

Mr Smith explained that when arrangements were being made for community pharmacists to supply prescriptions to medical card holders on the production of authorisation from health authorities they were informed by the Hospital Pharmacists' Association that such a course might be interpreted as strike-breaking. "Our only way out was to supply the medicines on a cash basis."

Mr Smith stressed that his members were not concerned about actual cash on the spot but in preventing action which could have been taken as strike-breaking.

While the strike was in progress members of the Hospital and Public Pharmacists' Association employed in voluntary hospitals instructed the Association to withdraw all services in support of their striking colleagues. The members concerned left it to the executive of the Association to decide on the date of withdrawal of service.

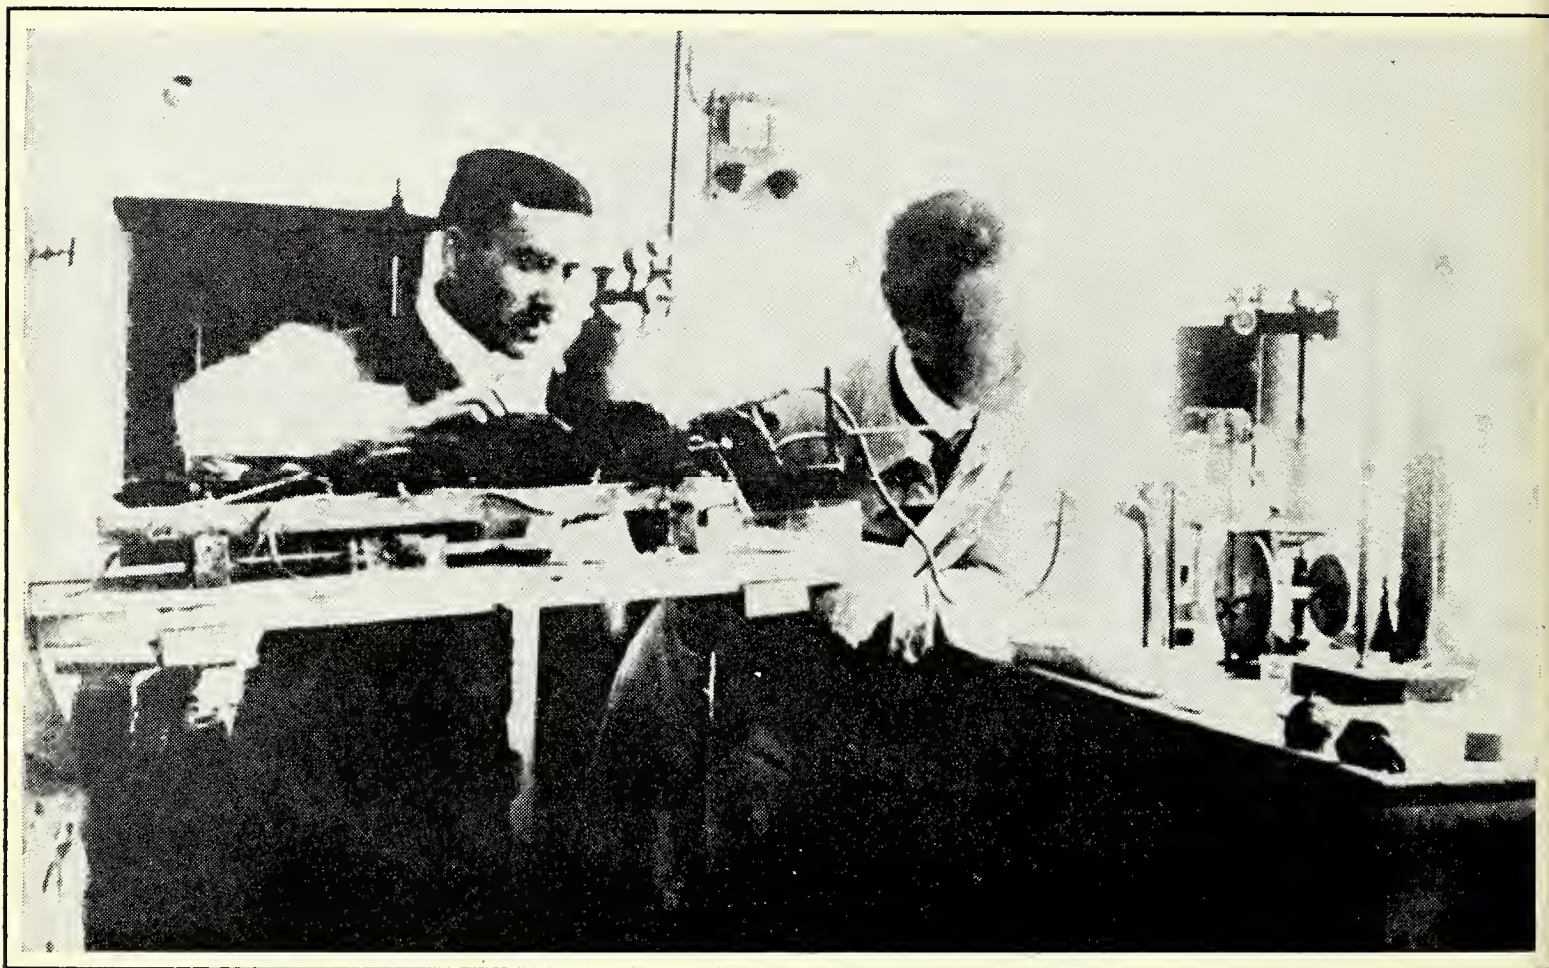

Benevolent Fund dance date

The Benevolent Fund dance will be held at the Gresham hotel, Dublin on December 1. Tickets, price 50s, can be obtained from members of the committee, care of the Pharmaceutical Society of Ireland, 18 Shrewsbury Road, Ballsbridge, Dublin 4.

*Sorry if we're keeping
you waiting*

You bought rather more New Liquid Radox herbal bath than we expected. We coped with that. Just. You sold a lot more than either you or we expected, and this is the reason for the present embarrassing stock situation. We've been working flat out and overtime to meet your repeat orders. Even so, we have had to keep some of you waiting. We're putting things right, and very shortly the position will be rectified. Meanwhile many thanks for your support, patience and understanding.

Fifty years ago Markus Guggenheim – working in the Roche Research Laboratories in Grenzach – first isolated L-Dopa, the substance now widely regarded as the most significant single breakthrough in the whole history of Parkinson's Disease.

Today, Roche Products Limited are happy to announce that Larodopa, the Roche brand of L-Dopa, is now generally available for prescribing both in hospitals and in general practice.*

Larodopa: The Benefits

This is a significant step forward, both in the percentage of patients who can benefit from treatment and in the amount of benefit they can be offered. Two-thirds or more of Parkinsonian patients benefit significantly – often dramatically – in mobility. **Larodopa** is the first treatment – medical or surgical – which reduces the paralysis (akinesia) of Parkinson's Disease as well as reducing the rigidity and the tremor.

Larodopa: Procedure

Dosage starts at a low level, and is increased gradually to match individual needs and response. Dosage may also need to be adjusted to minimize the side-effects which may occur.

Larodopa: Precautions

Side-effects – which are both dose-dependent and revers-

ible – occur in a large percentage of cases. They can be mitigated to some extent by adjustments in dosage. Long-term safety and efficacy have yet to be established.

Larodopa: Full Information For You

Treatment with **Larodopa** is capable of making a quite revolutionary change in the lives of patients with Parkinson's Disease and of their relatives. Roche feel that a responsibility is created by that fact: a responsibility for keeping everyone concerned provided with full and current information about **Larodopa**.

Roche propose to meet that responsibility by offering you a comprehensive information service on **Larodopa**. Details will be announced shortly.

*trade mark for Roche preparations containing L(-)- β (3, 4-Dihydroxyphenyl)-alanine.

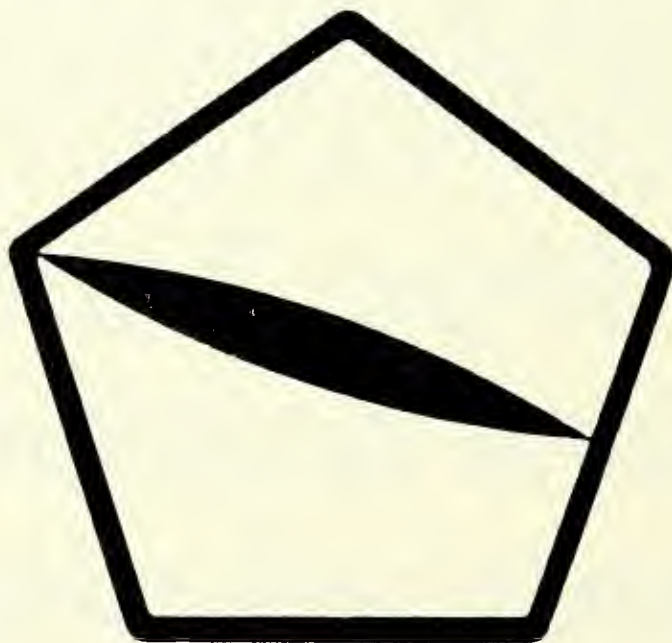

Full information is available on request from
Roche Medical Information Service/Larodopa, 15 Manchester Square, London W1M 6AP. Telephone: 01-935 5566

NEWS IN BRIEF

□ A Siena wet drug jar, circa 1525, was sold by auction at Sotheby's for £1,450 on November 3.

□ The Home Secretary has withdrawn the authority of Dr William John Hunt to possess, supply or prescribe Dangerous Drugs. Dr Hunt's registered address is Pelham Street, London SW 7.

□ The Medical Research Council has awarded a grant of £580 for research by Professor J. A. Simpson, Department of Neurology, University of Glasgow, into the treatment of Parkinson's disease with L-dopa.

□ A Polish delegation covering the entire field of packaging is visiting Britain November 15-28. It is the first ever official mission in that industry to visit Britain and could result in business worth millions of pounds over the next five years.

□ Commenting on Boots Ltd interim results (p 690), the city editor of the *Daily Express* wrote that "the higher prescription charges should prove a fillip later on." Mr J. Wright, secretary, Central NHS (Chemist Contractors) Committee, has written to correct the misconception.

□ Following the success of their one-day postgraduate refresher course at Bath University, the Bath and West of England Region of the Pharmaceutical Society is planning courses in both the northern and southern sections of the region.

□ Mr Peter Walker, Secretary of State for the Environment, this week made the following statement on pollution: "I am firmly of the view that those who pollute must pay for it. Whether it be at sea, in the air, on the land — or, shall we say, in the eye."

□ An Order laid before Parliament last week implements on January 1, 1971, the third instalment of the reductions in import duties undertaken by the United Kingdom in the Kennedy Round of international tariff negotiations. The Order indicates the decimal currency equivalents—effective from February 15, 1971—of specific duty rates.

□ The rapid decline in the mortality rate of children aged 1-14 is the subject of an Office of Health Economics "Information Sheet" issued this month. In 1968, the total number of deaths among 1-14 year-olds was 5,235. If the trend in infant mortality between 1901 and 1935 had continued, the number of deaths would have been 12,750, says the OHE.

□ The Consumer Protection Bill received a second reading in the House of Lords last week. Its effect would be to amend the present Act to allow local authorities to bring an action against a wholesaler or manufacturer when the retailer — who must be prosecuted first — is able to show he had reasonable grounds for believing the goods sold were in accordance with the regulations. The authorities could take action against suppliers not in their own area.

The Xrayser column

Worthy of his hire

Pharmacists in general have always tended to be modest in their assessment of their value to the community, particularly in the matter of charges for dispensed medicines—a modesty which I have not found apparent in my dealings with others such as the radio engineer, the watchmaker, the decorator and the plumber, to name only a few whose value to the community is no higher than that of the pharmacist.

It is an inherited defect, as may be found from a study of prescription books dating from before the first National Insurance Act of 1911, and to a large extent the situation prevailing at that now far-off time has affected all our dealings with Government over the years. It is still with us today. Indeed, I have been surprised to discover that the prescription charges for medicines 150 years ago were considerably higher than those of a century later.

Your reference to new scales of charges (page 641) should be carefully studied, for even if the new private prescription is something of a rarity these days, there are still, over the country, a number of tried favourites which have brought solace and comfort (and very little harm) for a long period, bringing a measure of immortality to the now departed physicians who originally prescribed them.

In many cases the prices charged for such mixtures, powders and pills—yes, pills!—have not taken account of the many factors which affect such transactions, and the necessary adjustments have not been made. It would be a salutary exercise to examine the fees charged and the cost of the ingredients each time a repeat medicine is ordered. I am not sure whether the pharmacist or the consumer would have the greater shock.

Personal service

I found the views of Mr Norman Fowler, MP, as expressed to a regional conference last week (page 667), of the highest interest and value. I was particularly impressed by his remarks in regard to personal service. He said that the public recognised that the pharmacist provided a service which, in the public interest, should be provided by professionally qualified men and women. It might be marginally more inconvenient, he went on, for people to have to wait in a pharmacy than simply to take part in a self-service operation but he thought that was acceptable provided that the supervision of the pharmacist was apparent.

That must be considered to be a public reaction, and it is one that we would do well to heed. I know that I am regarded as completely out of date by some, but I have never been able to come to terms with the pharmacy which resembles an archipelago, preferring the older fashioned peninsula of a counter. It represents a focal-point for the customer, and permits a degree of pharmaceutical supervision much more difficult to achieve in the more scattered concept.

Indeed, as a customer myself in other places of business devoted to a number of small units, I find difficulty in finding a member of staff to attend to my needs, and I wonder if, on second thought, Mr Fowler might not decide that self-service is in fact more time-consuming and less convenient. Pharmacy may regret its complete change from the "traditional," and time may yet show a change of pattern and a reversion to a more suitable background than some I have recently seen.

Public protector

I am in agreement with Mr Fowler when he says that the pharmacist's function is not to diagnose or treat diseases, and that he carries out a valuable function if he checks on self-diagnosis and refers people to the doctor. That is to act as a public protector, not always easy in the face of forceful and persuasive advertising by manufacturers of proprietary medicines.

COMPANY NEWS

Two Irish wholesalers to merge

P. C. Cahill and Co Ltd and May Roberts (Ireland) Ltd have agreed terms for a merger of the two companies.

Cahill are to offer three 5s ordinary Cahill shares and 15s nominal of 11 per cent unsecured loan stock 1991-96 for every five 5s ordinary May Roberts' shares and 10s 6d nominal of 11 per cent unsecured loan stock 1991-96 for each 5 per cent May Roberts' cumulative preference share of £1.

Taking the loan stock at par the terms value each ordinary share of May Roberts at 13s 4d and each preference share at 10s 6d and place a value on the whole of the issued share capital of May Roberts of £527,850.

Ordinary shareholders of May Roberts will be entitled to receive and retain a dividend of 5 per cent in respect of the year ending January 31 1971. The new ordinary shares of Cahill to be issued will rank *pari passu* in all respects with the existing ordinary shares of Cahill except that they will not rank for an interim dividend of 6 per cent which Cahill intend to declare in respect of the year ending April 30, 1971.

Directors of May Roberts will be invited to join the board of Cahill and Cahill will nominate directors to the board of May Roberts. It is intended that the name and business of May Roberts will be continued and the interests of the management and staff of May Roberts will be safeguarded.

In their current fiscal years Cahill estimate profits before tax at £160,000 (1970: £135,000) and May Roberts at £71,000 (£62,000).

Unilever's margins hit

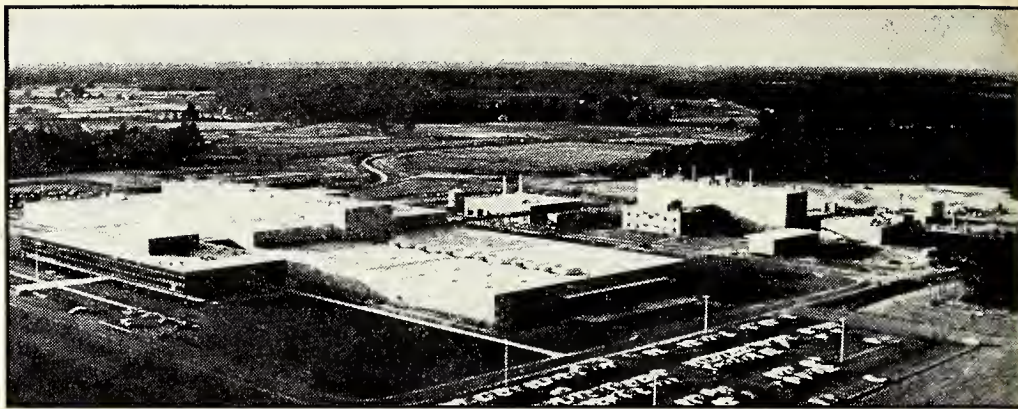

Although combined sales of Unilever Ltd and Unilever NV rose by 17 per cent in the third quarter to £728m the operating surplus at £41.9m was up by only 2 per cent due to high prices for oils and fats, say the directors.

Fourth quarter sales are expected to remain buoyant, but margins are expected to be affected as in the third quarter. The interim dividend at 10½d for Limited is unchanged.

L R C in irradiation

Agreement has been reached for LRC International Ltd to lease two gamma irradiation plants from the United Kingdom Atomic Energy Authority.

A new company, Irradiated Products Ltd, has been formed by LRC to provide

The new US production plant of Burroughs Wellcome Co at Greenville, North Carolina. The total plant provides 625,000 sq ft of floor space on a site of 450 acres. The plant was dedicated on October 30 at a ceremony attended by Sir Michael Perrin, chairman of the Wellcome Foundation Ltd. Burroughs Wellcome Co operated in Tuckahoe, New York, from 1924 to 1970 when its corporate headquarters and research laboratories moved to Research Triangle Park, North Carolina, and its production facilities to Greenville.

a confidential irradiation service to industry generally, with particular emphasis on the sterilisation of medical supplies.

Joining the company at Wantage, Berks, are three senior scientists from Harwell. They are Dr F. L. Dalton, Mr F. J. Ley and Mr J. Grant.

As directors they will be responsible for technical operations and for future research and development, working closely in collaboration with the UKAEA.

The managing director is Mr E. J. Davis of LRC International.

Beecham's half-year

Sales of Beecham Group Ltd for the half-year ended September 30 rose to £86,471,000 from £78,633,000 in the equivalent period of 1969. Group trading profit at £16.16m was over £2m higher and after tax was £1.1m higher at £8,323,000.

The directors have raised the interim dividend to 11 per cent (10 per cent).

More from Boots

Interim dividend of Boots Pure Drug Co Ltd is raised from 6½ per cent to 7 per cent for the year ending March 31, 1971. First-half world sales at £118.5m were up by £12m and the group profits, before tax, rose by over £2m to £10.71m. Net profit after estimated tax is put at £5.84m against £4.73m in the corresponding period of 1969.

Bayer profits fall

Net profit of Farbenfabriken Bayer AG dropped by 17 per cent in the first nine months of the year to DM244m compared with the same period last year.

During the period labour costs were up by 23 per cent while group sales at DM7,130 were up by 8.3 per cent.

In brief

Philips Medical Systems Ltd has been formed to carry on the business previously conducted by the medical apparatus division of Philips Electrical Ltd. This new company will provide a co-ordinated marketing and technical facility for the Health Service in Great Britain.

Maws Pharmacy Supplies Ltd and associated companies are now trading under their parent name of S. Maw Son & Son Ltd. This, the company state, is consistent with the strengthening of the marketing business, replacing the earlier wholesaling orientation.

Ilford Ltd (controlled by CIBA-Geigy) during the first eight months of the year had pre-tax profits of £1m (against £418,000 in the same 1969 period) from sales of £19m (£12.5m).

Associated British Maltsters Ltd had profit, before tax, of £878,000 for the year ended July 31. Profit, after tax, was £520,000 against £323,000 in 1969. Dividend is unchanged at 15 per cent.

Dermal Laboratories Ltd are moving on November 15 to Tatmore Place, Gosmore nr Hitchin, Herts (tel: Hitchin (0462 50621).

Appointments

Burroughs Wellcome & Co.: Mr Frodo Kilburn, BPharm, MPS, formerly manager of the company's home sales (medical department) has been appointed manager of their bulk sales division recently formed to handle contracts. Mr John Bowler, MPS, field sales manager succeeds Mr Kilburn in home sales and Mr Norman Hackett, MA, succeeds Mr Bowler. Mr R. K. Cain, MPS, has been appointed the company's resident manager in Japan.

Smith & Nephew Pharmaceuticals Ltd have appointed Messrs M. G. Crotch, company secretary; A. L. Togut, marketing manager, contact lenses; N. E. Bain, marketing planner, and P. H. Edwards, Southern area manager.

Dana UK Ltd have appointed Mr Guy Gentreau to the board. Mr Gentreau, who is European marketing manager, joined Dana Perfumes as marketing manager in 1965.

Carteret Products have appointed Mr W. H. Watson area representative for West London, Berkshire, Bedfordshire and Hertfordshire.

TRADE NEWS

Prescription products stolen

A number of prescription specialities were stolen from the Baring Road, Lec, London SE12, branch of Macarthy's Ltd on the night of November 5. The products and packs (batch numbers in parentheses) are as follows:— Aldomet tablets 250 mg 500 (122S7, 122S8); Cremosuxidine 200 ml (75S43); Indocid capsules 25 mg 500 (147S2, 147S8); Indocid suppositories 12 (87S68, 87S69); Tryptizol tablets 10 mg 500 (S5203), 25 mg 500 (130S5), 50 mg 100 (S610); Valium tablets 5 mg 500 (710150).

Any pharmacist who is offered any of these products is asked to contact Macarthy's Ltd, or the local police.

Change of pack size

Pond's Spray 'n Stay is now available in a 300g aerosol (8s).

The customer's attention is drawn to the "Maxi size—Mini Price" special offer flash. The giant aerosol is available both in normal hold and in the popular firm hold for more difficult hair which tends to lose a set easily. (Chesebrough-Pond's Limited, Victoria, London NW 10.)

One contract factory service

A complete factory or warehouse building in exchange for one signature on one contract is offered as a comprehensive service to small and medium-size industrial and commercial undertakings by Taylor Woodrow (Arcon) Ltd. One contract includes everything from initial consultancy and site location to final landscaping on completion of building.

Taylor Woodrow (Arcon) is a professional service company supplying survey, finance, planning, architectural, building erection and supervision, and landscaping facilities. Steel framed buildings from 10,000 sq ft upwards are supplied on a competitive basis and the one-contract service is particularly valuable for the smaller client.

The service begins with technical advice on site location and building design to suit each client's needs and budget. Buildings are not offered from a range of sizes, but are individually designed from steel components after computer based calculation of all design and cost data. (Taylor Woodrow (Arcon) Ltd, 41 Welbeck Street, London W1M 7HF.)

Bonus offers

White Laboratories Ltd, Penarth Street, London SE 15. Rinstead pastilles. 52 invoiced as 48 (until December 24). From representatives.

Reckitt & Colman, pharmaceutical division, have produced this new two-tier counter display in vacuum formed white styrene, designed to ensure prominent counter display for Disprin and Junior Disprin. Designed to ensure maximum flexibility in siting and replenishing it measures 11½in deep by 12½in wide by 6in high. The top tier rests on two pillars and can be moved for separate display if desired. Silk screened strips on the fascia present Junior Disprin and Disprin in their traditional colours of pink and white, and blue and white respectively. The unit is designed to have a life of nine to twelve months and is available only to retail pharmacists. (Reckitt & Colman pharmaceutical division, Hull HU8 7DS.)

PROMOTIONS

Chemists' baby box widens its distribution

The "baby box" produced by the Expectant Mother Information Service has been so successful that the demand has necessitated the issue of an extra 100,000 boxes.

When a consortium of six manufacturers launched the Service through chemists in February, it was intended to issue 300,000 boxes in two stages, during 1970. But with the additional issue, the total will be 400,000 boxes in nine months. This allows one for every mother expecting her first baby — approximately 37 per cent of the total birth rate.

The third "leg" box includes two more manufacturers who now join to the original consortium of Maws, Glaxo, Trufood, Calmic and Robinson's. One is Lastonet, makers of support hose, the other Chesebrough-Ponds, whose product 'Q' Tips dominates the US market and has a rapidly expanding market in the UK.

The distributors Multilink Services are now dealing with requests for boxes from mothers expecting additions to the family. This new demand has widened the scope of the box, and in 1971, 600,000 will be distributed, catering for 80 per cent of the total UK birth rate.

Multilink predicts a great success for the venture in 1971. The bigger market potential has already resulted in more

manufacturers applying to join the consortium.

Part of the EMIS success is attributed to its special importance to chemists. By presenting the box before the baby is born, he is able to create not only initial but repeat purchases.

The scheme also brings together the groups with which the expectant mother has to deal throughout and after pregnancy and confinement — doctors, midwives, health visitors and chemists.

Farley's over low-cost gifts

"Farley's family budget shop" is an on-pack promotion incorporating a range of nine items chosen to give a mother value-for-money and to make available to her useful merchandise of which she may not normally be aware.

The prime in-store period is expected to be from now until after Christmas and emphasis has accordingly been placed on gift and winter-orientated merchandise. The items are: Universal food chopper, rayon plus poodle, Melamine heat-resistant beakers, baby changing pad, silicone-proofed pushchair muff, silicone-proofed cape with hood, Watch Dog steering wheel lock, Sona electric toothbrush, nursery heater.

The items give a price range from under £1 to almost £8. Each Farley's rusks carton features two items, but carries brief details of all nine. (Farley's Infant Food Ltd, Plymouth, Devon PL3 5UA.)

Consumer offers

☐ During January 1971 only, Arden are issuing the large size bottle of Blue Grass hand lotion to retail at 25s instead of 42s. (Elizabeth Arden Ltd, 25 Old Bond Street, London W 1).

☐ Trade price of Ingram's economy-size lather pack carrying a "38 grms free" flask (last week, p 654) is that of the large pack [corrected note].

☐ Closing date of NPU Marketing's offer on its nail polish remover (last week, p 654) is November 30 [corrected note].

NEW PRODUCTS AND PACKS

Baby foods

Two more from Robinsons

Continuing their policy of providing as wide a choice of Instant Baby Foods as possible, Robinson's will be adding two new varieties to their range this month.

The two newcomers, cheese and tomato (1s 6d) and plum and semolina (1s 6d) bring the range up to a total of 24. (Reckitt & Colman Food Division, Carrow, Norwich.)

Cosmetics and toiletries

Free during January

To the Satura range Dorothy Gray are adding a cleansing cream that can be washed off — or tissue-removed — in the conventional method. The pack is a 4oz jar (13s) and it will be launched on January 1 with an introductory offer: a 4oz jar free with purchases of a 15s 9d jar of Satura moisture cream.

Satura cleansing cream is presented in a white lightweight jar, with a navy cap, and packed in Dorothy Gray's new hexagonal outer carton. (Dorothy Gray, 45 Conduit Street, London, W1R 0DT.)

New 'Gold'

Femfresh have repacked and re-priced their gold deodorant. The new pack is a slim aerosol can containing 60 g (6s 7d). It retains the original Femfresh Gold pack colours, soft gold-leaf with black type and cap, but the aerosol valve now has a separate cap in line with the other Femfresh presentations. (Anestan Ltd, Rankine Road, Daneshill Estate, Basingstoke.)

Almay and dry skin

Almay have introduced five new products to "provide the most complete answer yet to dry skin." Almay extra moisture guard forms a daytime barrier against dryness. Pack is a 2 oz jar (18s). Extra creamy cleanser is an emollient cleansing cream which gently removes every trace of make-up, again packed in a 2 oz jar (16s). Almay gentle skin toner is a non-drying skin tonic. It closes the pores after cleansing and removes any surplus grease. Issued in a 100cc bottle (16s). The night care cream is quickly absorbed by the skin. Pack is a 2 oz jar (19s 6d). Specially formulated for the sensitive

delicate area around the eyes is eye care cream that is issued in a $\frac{1}{2}$ oz jar (14s). (Almay Cosmetics, 9a New Bond Street, London W1.)

Sundries

Handbag accessories

Added to the range of Stratton handbag accessories is a new handbag mirror, reference No 181/781, with 21st Birthday motif on the reverse side. The florentine background is framed by an ornamental surround and handle — 12 designs available. There is also the new "eye-spy" magnifier, reference No 144/56, the lady's companion. Nine different designs are available to this novel idea from Stratton. (Loughton & Sons Ltd, Warstock Road, Birmingham 14.)

Polaroid '71 sunglasses

The Polaroid '71 collection, includes 60 different frame shapes. Taking into account variations in frame and lens colours, there is a total of 106 different models from which customers can make their selection. The 60 models comprise 8 clip-on styles, 15 metal-framed glasses (including two rimless models and the popular VIP range). There are 37 plastic designs of which the three most dramatic are "vacuum-coated in blazing silver."

Of these 60, 21 are brand-new designs anticipated to be the sunglass fashion leaders in 1971. There are four new clip-on styles (including a metal-rimmed model), 6 metal "trendsetters," and 11 plastic frames, of which two are vacuum-coated in silver.

and how the pharmacist

There are many thousands of Acne sufferers in this country today and a high percentage of these prefer to seek the advice of the local Pharmacist rather than consult their G.P. In these cases, you, the Pharmacist, can confidently recommend Quinoderm Cream to help your customer overcome a condition which in many cases can have adverse psychological effects. At the same time you can help yourself to the good return which Quinoderm allows you.

Exclusive Pharmacy Product

Quinoderm is exceptional in that it is only available from YOU the

pharmacist. There is no competition from beauty shops, department stores or supermarkets giving you the sole right to recommend a first class product.

Clinically Tested

Quinoderm has undergone extensive trials by many leading dermatologists and in a recent trial results were described as "excellent" or "very good" in 90% of the cases of Acne Vulgaris treated with this clean, effective and inexpensive product. The trials included both Quinoderm Cream and Quinoderm Hydrocortisone (Quinoderm Hydrocortisone).

HELP YOUR CUSTOMER—HELP YOURSELF
recommend Quinoderm Cream for the treatment of Acne

Quinoderm Cream is a formulation of Potassium Hydroxyquinone Sulphate (0.5%) and Benzoyl Peroxide (10.0%) in an astringent cream base.

THE QUINODERM COMPANY

The outstanding Polaroid sunglasses for 1971 are square in shape with a wire-rimmed square maxi-glass (model 4111), and the largest glass in the whole collection is a square-framed tortoiseshell model (Model 7101). The other new shape? The "keel" line, where the lower line of the glasses is curved like a yachting hull. The trend in frame materials is towards metals and plastics that are coated with a metal finish.

Besides Polaroid's standard neutral grey and tan lenses, there are now very pale high transmission lenses in "see-through" grey and tan.

Prices range from 28s and there is a choice of more than 50 frames under £6 and one hammered gold design at over £8. (Polaroid (UK) Ltd, Rosanne House, Welwyn Garden City, Herts.)

Throwaway Finnish toothbrush

An innovation from Finland is Hydent, a hygienic disposable toothbrush ideal for use in hospitals and factories—for which a vending machine can be supplied.

The toothbrush has toothpaste already injected into it and only needs wetting under a tap to be ready for use. It has 192 bristles of semicircular section which are designed to give the best cleaning action whichever direction it is used. The brush is 3½in long, made from polythene in a wide variety of colours.

Each one comes individually wrapped in a strip of hygienic transparent aluminium foil with 120 brushes to a box. Prices depending on quantity vary between 1¼d and 3¼d each. (Innovation, 2 Paragon Place, London SE 3.)

New packaging for Dasco

New full colour boxes are being used for the 1971 range of Dasco Naturals. As in previous years Dasco are offering the traditional buckle style sandals, but this time with fully padded straps. The platforms are made from polished beechwood. Two more fashionable lines are to be known as models ON3, and ON5 depending upon the height of the heel. The platforms for these are produced from a highly polished lightweight wood with straps having lace-up fastenings, available in kid leather or velour suede in a variety of colours. (Dunkelman & Son Ltd, The Manor House, Desborough, Northants.)

PRESCRIPTION SPECIALITIES

ANAFRANIL capsules, syrup, injection

Manufacturer Geigy (UK) Ltd, Pharmaceuticals division, Macclesfield Ches, SK10 2LY

Description Two-tone (orange-caramel) capsules each containing 25 mg clomipramine hydrochloride. Orange-flavoured and coloured syrup containing the equivalent of 25 mg clomipramine hydrochloride in 5 ml. Ampoules containing 25 mg clomipramine hydrochloride in 2 ml

Indications Endogenous depression, including manic depressive, periodic and involutional depression. Reactive and neurotic depression

Contraindications Therapy with monoamine-oxidase inhibitors (or within 14 days of their use); existing liver damage; pronounced cardiac or circulatory failure; hypotensive tendency. See literature

Dosage Capsules or syrup, 25 mg two or three times daily for the first two or three days, increasing to 50 mg three times daily. Higher doses may be required in severely depressed patients. Ampoules for intramuscular injection may be used in unco-operative patients or the severely depressed, transferring to oral dosage when the therapy has started to be effective

Precautions Caution in conditions where atropine-like drugs are contraindicated and in epileptic patients. See literature

Side effects Most common are dry mouth, sweating, difficulty with accommodation, constipation and disturbances of micturition. Tremor, ataxia, hypotension also noted. Epileptiform convulsions in a few patients. See literature

Packs Capsules 100 (42s 6d trade) and 500 (205s); syrup bottle of 150 ml (38s 6d); ampoules 10 (25s) and 50 (120s)

Supply restrictions Recommended treat as PI, S4B

Issued November 1970

LETTERS

Gulling the doctors

In the *C&D* of October 3 (page 601) a hospital colleague is quoted as saying "there is not a trick so low that some pharmaceutical firms will not adopt to persuade gullible doctors to order branded compounds." This is rather an astonishing statement. Are all hospital employees (pharmacists and others) so virtuous and pure that they are beyond criticism themselves? There would appear to be many gullible individuals in the health service, with the amount of "empire building" that is occurring now that the purse strings have been opened. And, what of the many pharmacists who use the hospital service as an escape from work?

He also states that "drugs are available under the approved name with quality vouched for by rigorous quality control testing" in the hospital service. "Rigorous quality control" is surely open to question. The better pharmaceutical houses have analytical control laboratories with staff who are expected to be experts in the analysis and control of a limited range of products marketed by a particular firm. Is it practical for hospital groups, or for that matter regions, to have small analytical departments staffed by pharmacists who will be expert in *all* aspects of the analytical control of *all* the drugs used in medicine? Surely it is impossible to do more than screening tests without incurring enormous costs.

Why is it that so many hospital pharmacists want to impinge on other disciplines rather than do the job for which they are trained?

Baffled

Swiss pharmacy

Mr Marriott (*C&D*, September 19) has read too much into my comment that drug stores of the British type exist in Switzerland. I did not mean to imply that those of Switzerland are identical with those in the British Isles but was distinguishing those run by non-pharmacists (British type) from those run by pharmacists (American type).

I cannot, however, accept Mr Marriott's version which described the situation in an over-simplified and even misleading form. The contention that a British drug store is a "chemist's shop without a chemist," is not acceptable because a drug store proprietor is, in effect, an ordinary trader; no qualifications are required to open such a business, and any person (apart from a trader in the open market) can sell uncontrolled medicines. Mr Marriott apparently regards the pharmacist's right to sell and dispense Part I poisons and to dispense NHS prescriptions as being unimportant, and does not mention the restriction of certain titles (eg Pharmaceutical Chemist) to pharmacists.

It is true that the Swiss drug store (*Droguerie*, *Drogeria* or *Drogheria*) differs from a British drug store in that

the proprietor usually holds a certificate and belongs to an association. The chief difference between the Swiss pharmacist and the druggist lies in their training. The pharmacist, as in most other countries, must attend a proper university or university level course and sit a state examination at the end of it. A pass in this examination entitles him to run a pharmacy. In some cantons, the owner of a pharmacy must himself be a pharmacist; in others, only the manager need be.

The druggist does not have a university background. He acquires his knowledge either by undergoing an apprenticeship or by attending courses at a special training college. The qualifications a person must have before he can practise as a druggist or call himself a druggist vary from one canton to another.

The sale of drugs in Switzerland is regulated on an intercantonal basis. For sales purposes, drugs are divided into the following five categories:

- A. Drugs to be dispensed in pharmacies only, on production of a non-repeat ("ne repetatur") prescription; this category includes narcotics.
- B. Drugs to be dispensed in pharmacies only, on production of a prescription.
- C. Drugs to be sold in pharmacies only, without a prescription.
- D. Drugs to be sold in pharmacies and *drugstores*.
- E. Drugs, the sale of which is not subject to any restrictions.

The crucial category is D, which includes, for instance, not only tinctures, tisanes, vitamins, and similar "harmless" preparations but also amidopyrine, phenacetin, acetylsalicylic acid, and combinations thereof. Drugs falling into this category can therefore also be sold in drug stores. In addition there are the over-the-counter pharmaceutical specialities prepared by the druggists' association and sold in drug stores only.

Conversely, the pharmacist usually also sells the kind of medicinal preparations, perfumery goods, and cosmetics that really belong to the sphere of the druggist. Consequently, no clear-cut dividing line can be drawn between the range of goods sold by the pharmacist and the range of drugs sold by the druggist. Only the pharmacist is authorised to fill medical prescriptions and to dispense drugs figuring in the categories A B and C.

Tradition, of course, plays a very important role, and the entire subject is rendered even more complicated by the absence of federal drug laws applicable to the whole of Switzerland. The responsibility rests with the individual cantons, except insofar as they are willing to delegate this responsibility to a central body.

It is not correct to say that the Swiss druggist in an integral part of the medico-pharmaceutical set-up any more than is the owner of the British drug store who is not, of course, allowed to call himself a druggist.

I believe that my generalisation was justified, especially in the sense explained in paragraph 1 of this letter. Incidentally, there is now a drug store of the American type in Geneva.

T. D. Whittet
London

Ski holiday

The British Pharmaceutical Students' Association's ski holiday will be taking place from December 27 to January 2.

The cost will be £28, including travel, hotel costs and ski hire and instruction. A coach is leaving London on December 27 and going to Grantown-on-Spey via Birmingham, Manchester, Carlisle and Glasgow.

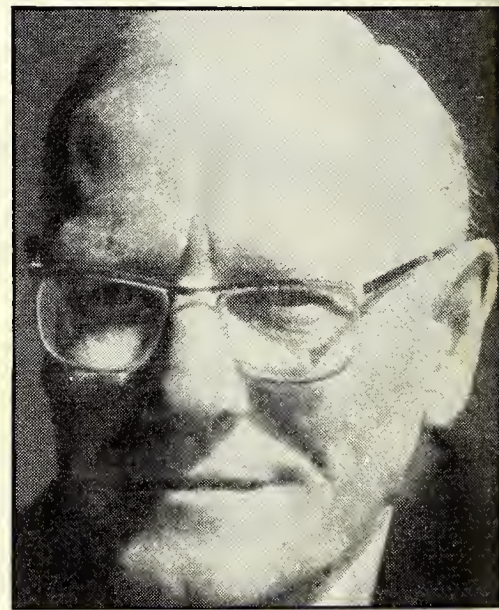

A £7 deposit is required, sent to me at The Department of Pharmacy, University Park, Nottingham, NG7 2RD.

Recent graduates are welcome.

David Anderson
BPSA

PEOPLE

Mr H. Harvey, MPS, FBOA, after serving for many years as area manager in the South-east for National Co-operative Chemists Ltd, has retired. On his retire-

ment the branch managers in his area presented him with an electronic table lighter, pocket lighter, and engraved cigarette box. In his retirement Mr Harvey will live at Cheddar, Somerset.

Mr George W. Froom, representative in the South of England for Macfarlan Smith Ltd, has retired after 51 years' service.

Deaths

Egan: Recently, Mr Henry G. Egan, MPSI, West Street, Drogheda, Irish Republic. Mr Egan, who was in his late fifties, qualified as a pharmacist in 1957. He was manager of Luke J. Healy Ltd, Drogheda, for many years up to his death.

Stewart: On October 25, Mr John Alexander Stewart, MPSNI, 771 Upper Newtownards Road, Dundonald, Belfast. Mr Stewart qualified in 1927, after serving his apprenticeship with the late Mr S. J. Hudson, Belfast. In 1931 he opened a pharmacy at 769 Upper Newtownards Road, Belfast, where he was in business until he retired in May 1970.

to cap 'em all **Unicap**[®]

"The one-piece-injection-moulded-polypropylene-screw-cap!" Cap that! We couldn't so we decided to call it Unicap. But that's the only change—the quality stays constant. Suitable for glass and plastic bottles, Unicaps have already met with special success in the pharmaceutical and cosmetic fields.

We have three standard ranges: R3, 18mm to 33mm; R4, 18mm to 28mm; Metric Medical, 22mm to 31mm. Red, black and white are readily available. Other colours can be produced against order. Enquiries are invited for custom moulded Unicaps.

If you have a product that needs capping, try **Unicap** first.

MACDONALD'S

INTRODUCE FOR AN EXPANDING MARKET...

4 New Cotton Wool products

PLEATED COTTON WOOL

A high quality blend of cotton wool and rayon, now made in a handy piece-at-a-time form. Pleated cotton wool makes a valuable – and profitable – addition to the Macdonald range of Household Cotton Wool rolls. Available in a popular 50 grms. and an economy 200 grms. pack.

... and SNODROPS

Made from pure rayon, Snodrops are a top quality improvement on ordinary cotton wool balls, with a steady demand for nursery and cosmetic use. Packed in attractive, hygienic polythene bags of either 50 or 100 balls.

COMMENT COMMENT COMMENT COMMENT COMMENT

A call for evidence

Chemist contractors who like to know how they are paid—and who may think there is a better way—have a full week ahead of them. In this week's issue we publish (p 681) an invitation to them from Sir Hugh Linstead's working party to submit evidence of what is wrong with the contract, and with the pharmaceutical service in general.

But before they put pen to paper, we suggest they take a long, hard look at the method by which remuneration is worked out now. This is summarised in the working party's "guidance," but a booklet to be issued next week by the Central NHS (Chemist Contractors) Committee goes into much more detail (see p 711).

Whenever contract matters are discussed with those who negotiate on behalf of contractors — both committee members and officials—their invariable answer to critics of the contract is "But can you put something in its place that will give a better deal?" We have always upheld the view that change must not be for the sake of change—but have also supported the rank-and-file critic who finds it very difficult to understand the "mechanics" of negotiation. For that reason, we welcome the clear and concise way the Committee's booklet sets about explaining the procedure for remuneration review.

The obvious criticism that remains, even after reading the booklet, is that during any period of rapidly-rising costs, remuneration can lag behind. Of course, it works the other way when costs go in the reverse direction, but any suggested change which would keep abreast of costs would need to obviate constant adjustments. And it should be remembered that Government indices are already used to update labour and certain overhead costs. The "something better" may require some ingenuity.

We are pleased to learn that the working party proposes to view its terms of reference.

Although precluded from consideration of the planning of the pharmaceutical service, it is ready to receive evidence of a general nature on that subject, provided it has relevance to the contract. Those who have seen the working party as impotent because of the exclusion, *may* be appeased by this opening of the door, but we suspect they will want more.

Certainly it is difficult to see how the working party will be able to give any useful consideration to "the organisation of the service," or "health centres" without knowing what the attitude to planned distribution is to be. It will therefore have to work closely with the Society's committee on a planned pharmaceutical service if the possibility of conflicting proposals is to be avoided. Once again we would point out that the working party owes its existence to a move to get a contract designed to *create* planned distribution.

Local consideration

It is noted that the working party has already invited group evidence from a wide variety of organisations—most contractors should find themselves giving indirect evidence through at least two bodies in the list! It would be wise therefore, if the individual who has a comment, discussed it first with his colleagues so that the working party is not overburdened with ill-considered ideas. The branch of the Pharmaceutical Society or the local Pharmaceutical Committee are the more obvious forums.

But this is also a time for the individual. Many pharmacists complain about the lack of consultation on matters affecting them personally. They will have no one to blame but themselves if they do not take advantage of this opportunity.

BOOKS

Das Kölner Dispensarium von 6551. George Edmund Dann. *Wissenschaftliche Verlagsgesellschaft mbH, Stuttgart, Germany.* 8½ x 5½ in. Part I. Explanations. Part II. Facsimile text. Pp. 65 and 222.

The two-volume publication, No. 34 in the series issued by the International Society for the History of Pharmacy, contains in its first part explanations of the work's scope, title, format, aim, author, contents and sources. The author answers the question: "Is the Dispensarium a Pharmacopoeia?" and discusses its comparative status with two other 17th-century German pharmacopoeias namely, those of Nuremberg (1546) and of Augsburg (1564).

The publication is dedicated to the memory of Theodor Husemann, physician and co-author of a handbook of toxicology and himself an historian of pharmacy who did pioneer work on the pharmacopoeias of Cologne.

Part II of the publication is a facsimile reproduction of the Dispensarium itself, handsomely printed on a laid paper but in the uniform of the series. The text being, of course, in Latin, the book should appeal as a stylish acquisition upon the shelves even of non-German-reading pharmacists.

Drug Information for the Health Professions, II. Isaac D. Welt, Editor. *Gordon and Breach Science Publishers Ltd, 12 Bloomsbury Way, London WC 1.* 9 x 6 in. Pp 382. 75s.

Since much of this printed record of an inter-disciplinary conference held at Princeton, New Jersey, USA, in 1968 is related to information services available mainly or exclusively to US subscribers, it might be thought to have little value to readers on this side of the Atlantic. That would be a wrong conclusion.

Anyone, in any country, whose concern is with gathering, assessing and disseminating information about drug action and side effects will gain by reading it. The basic problems, principal among them how to track down information in the reverse direction from the one in which it originally appeared in print (or other

medium), are the same in all countries.

Something may be gained, too, from a study of the mechanism of the conference, for which a grant was available in the first place (from the National Library of Medicine to the New York Academy of Sciences).

Would a similar sponsorship be worth seeking for such a conference in Britain, bringing different disciplines? Characteristic of the Princeton conference was "free floating security," which was summed up as meaning: "Don't speak when I'm interrupting." That principle or technique was adopted because "our rediscovery is that people communicate not by speaking at but by conversing with each other." Hence there were no formal papers. "Discussion leaders" previously had done too much leading!

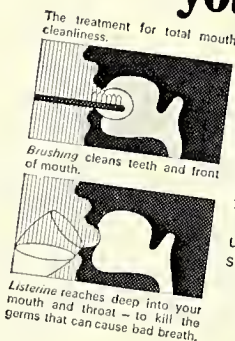

Once the British reader gets used to the "Jean, this would be great" and "May I interrupt you for a moment, Paul?" he finds that the method really does seem to promote the flow of ideas. By the time he has finished the book he may also be hoping that one of the aims of the conference, namely an ideal form of abstract, is within sight of achievement.

**When your breath matters most,
your toothbrush isn't enough.**

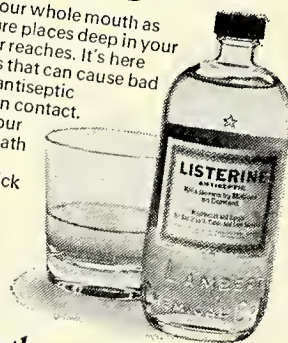

You can't rely on your toothbrush to keep your whole mouth as fresh and clean as you'd like it, because there are places deep in your mouth and throat where your toothbrush never reaches. It's here that germs collect in large numbers – the germs that can cause bad breath. You need Listerine. Listerine is a liquid antiseptic mouthwash, that kills these germs by millions on contact.

The strong, invigorating taste tells you that your mouth is being thoroughly cleaned and your breath freshened.

So, when you've put down your toothbrush pick up the Listerine and rinse and gargle for a few seconds.

Be confident you've done a thorough job. Listerine – the world's leading mouthwash.

Listerine Antiseptic Mouthwash - for fresh breath confidence.

Pharmaceutical Society
of Great Britain

Council discusses 'Great drug fraud' charges

The Council of the Pharmaceutical Society at its meeting last week discussed the BBC Television programme "24 hours" and *The Sunday Times* magazine article "The great drug fraud," which had appeared on October 23 and 25 respectively.

The president and the secretary and registrar described the strenuous steps which had been taken to ensure that the Society's statements on the matter received publicity. Council discussed the whole matter at length and serious concern was expressed at the way the programme and the article had been presented.

The Council agreed that a letter should be sent to the Secretary of State for Social Services, reiterating the Society's opposition in principle to prescription charges. It was also agreed that a similar letter should be sent to the Central NHS (Chemist Contractors) Committee recommending that it should approach the Department of Health and Social Security with a view to obtaining supplies of the redesigned poster dealing with the exemption and "season ticket" schemes for display in pharmacies. It was also recommended that the Central NHS Committee should be requested to approach the Department of Health and Social Security on the question of prescriptions for exempt patients being written on a readily identifiable form. It was further agreed that the implication of the latter recommendation should be discussed with the British Medical Association at an appropriate time.

Opposition to cost-related levy

The members of the general practice subcommittee expressed their absolute opposition both in principle and on grounds of practicality to any scheme which would seek to relate the levy to be paid to the ingredient cost of the item concerned.

The Law Committee had considered the problems arising from Poison Rule 13, that a prescription for a Schedule 4A poison must include the dosage before a pharmacist can dispense it. The Committee took the view that the problem could be resolved only by making it an offence for a doctor to issue a prescription for such a scheduled item without the dose being included. It was recommended that a further approach should be made to the British Medical Association before approaching the Poisons Board with a view to obtaining a change in the law, and if that failed it was recommended that further consideration should be given to advising all pharmacists who receive incomplete prescriptions to return them without dispensing them as they were obliged by law to do.

Mr J. C. Bloomfield reported that a letter had been received from the General Medical Services Committee of the

British Medical Association stating that that committee was now prepared to support the Society's case in connection with the amendment of Rule 13 [that the pharmacist should enter the dose]. A letter had also been received from the Poisons Board saying that the Home Office legal advisers considered that the amendment was not practicable. He suggested that further approach should be made to the Board to ask the Home Office legal advisers to state a case why the recommendation could not be implemented. Mr Bloomfield moved that that action should be taken. Mr. Howells seconded the motion.

Wrong to instigate dosage

The amendment to the rule that has been suggested is that pharmacists should be enabled to add the dose to a Schedule 4A prescription, if the intentions of the prescriber are known to him, and Mr J. P. Kerr suggested that it was wrong for the pharmacist to take the responsibility for the dosage for the patient. He was prepared to argue that the pharmacist had responsibility in relation to dose checking, but for a pharmacist to instigate a dose was another matter.

Mr W. A. Beanland supported Mr Kerr. It was wrong, he said, that any compromise should lower the safety of the patient. For the pharmacist to take the responsibility for deciding the dose would lower the safety standards so far as the patient was concerned.

Mr A. Howells said that he had a great deal of sympathy with Mr Kerr's point of view concerning responsibility. Nevertheless, the BMA had accepted the Society's scheme, and he was concerned that, following the refusal of the Poisons Board to implement the scheme, we were now appearing to attack the BMA which had supported our proposition in the first instance.

The president said that the recommendation from the Law Committee was that a further approach should be made to the BMA, and one assumed from the Committee minutes that the approach would be to tell the BMA to put its own house in order. If it did not put its own house in order, then the recommendation was that the Poisons Board should be approached to say that the legal responsibility for such an incomplete prescription should be placed on the doctor. That seemed to be discourteous in view of past discussions which have taken place between the Society and the BMA.

The treasurer said that it was realised

that the pharmacist might on occasions be put in an impossible position, and that the Society desired to discuss with the BMA the possibility of a new approach to the Poisons Board.

The president said he would accept that. If Council felt that further consideration should be given to the matter, then it should vote against Mr Bloomfield's motion.

Mr Bloomfield said that it was difficult to see what further discussion could take place between the Society and the medical profession. He reminded Council of the letter received from the General Medical Services Committee deciding to support the Society's proposals for amending the Poisons Rule, and decided to give publicity through local medical committees to the need for general practitioners to complete the dosage and other information on prescriptions for Schedule 4A drugs. It was difficult to see how the medical profession could go any further in the matter.

Prescriptions were being dispensed throughout the country which were illegal. The only alternative was to send them back to the prescriber.

As far as pharmacists were concerned, that course had been opposed on the ground of inconvenience to the public. The doctors had now said that they would support the Society, and would do what they could to get their colleagues to conform with the law. In his view his resolution was a correct and proper way to proceed with the matter.

The motion moved by Mr Bloomfield was carried. The Law Committee's recommendations were withdrawn.

Planned service

The minutes of the meeting of the Committee on a Planned Pharmaceutical Service were presented by the president and included the recommendation that the chief pharmacist at the Department of Health and Social Security should be asked to provide information to the Society about all health centres at present being built and in the planning stage, and that information should be sought about which stage consumer and professional interests were invited to comment upon the siting and other aspects of any proposed health centre.

Mr Bannerman disagreed with a decision that no change should be made in the present advice to pharmacists in whose area a health centre was to be established. In his view, a positive approach was the only answer — getting pharmacists who were involved to examine the possibility in the first instance of setting up practice inside the health centre on a consortium basis. That would ensure certain guarantees which could not be adequately secured when working outside the health centre.

The problem of the retention of books of records required to be kept under the Poisons Rules at premises which have ceased to be a pharmacy was considered by the Committee. The Committee recommended that the Home Office should be approached for the provision of a regulation requiring the pharmacist concerned to keep the necessary books.

Philips photographic pack

The new Flashpack 7

Here's the latest version of the famous Flashpack. Each holds 48 PFC4 (192 flashes), 80 PF1B, 50 AG1B Super. The PFC4's are packed in two card dispensers with 8 x 3 cube packs in each (24 cubes, 96 flashes). Great feature of these sturdy packs is the gravity feed system which makes for quick, efficient handling of individual cubes, cuts out frustrating fiddle! Use your gravity feed dispenser on your counter or fix it to the wall with its own self-adhesive wall mounting.

Each Flashpack 7 holds our usual handy dispenser with a supply of leaflets giving hints on flashlight photography.

The Halogen Projector Pack

Every Halogen Projector Pack contains a clear, plastic Handipack with eight tungsten-halogen lamps stowed neatly inside—four A1/215's and four A1/216's.

These fit over 80 popular types of cine and slide projector. You'll find the Handipack ideal for display either as a counter unit or as a wall unit using any number of Handipacks locked neatly together with their own special interlocking sides. And when you've sold all your Philips Halogen Projector Lamps you can use your Handipack units for filters, adapters or lenses. Display the lamps in the Handipack and get the best out of sales.

Philips brighten up photography

COLD WEATHER COMFORT —AND PROFITS

You simply cannot lay down rules about customer demand. If that fact needed underlining, you would have to look no further than the familiar hot water bottle for your evidence.

Compare the sales patterns of the autumns of 1969 and 1970. In both years, warm and often sunny weather persisted long after its customary period. And what was the result?

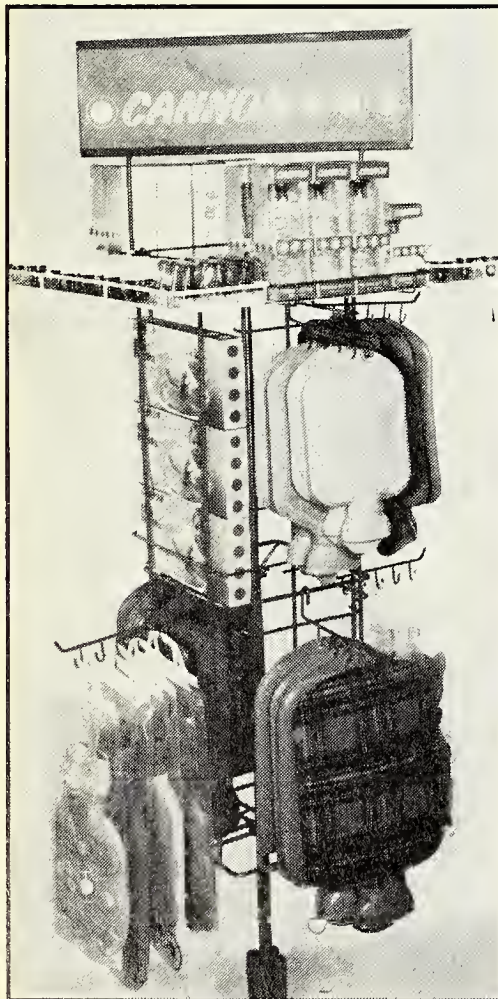

Last year there was a slow start to the hot water bottle season, with the overwhelming bulk of business being done by retail stockists in the immediate pre-Christmas period and in the New Year; this year, a really active start to the season, with manufacturers already reporting a substantial weight of repeat orders.

Did a lot of people get caught out by the sudden onset of cold weather last year, and are they now making sure they will not do the same thing again? Did the few cold days that gripped most of the country early in October serve as a vivid reminder to the public that winter really was going to come?

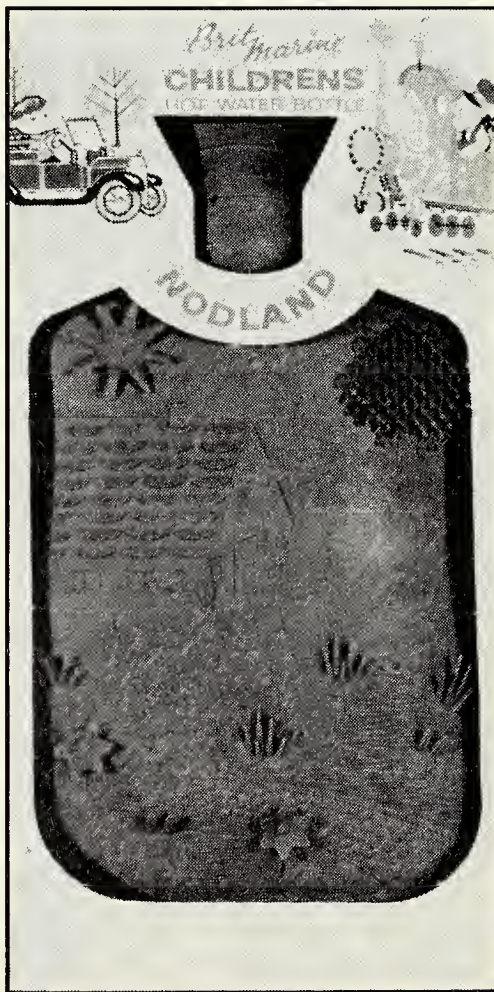

Whatever the reasons behind the present build-up to what promises to be an exceptionally busy season, it is certain that the leading manufacturers have come up with ranges calculated to help the retail pharmacist exploit it to the full.

Let us look at what some of the major suppliers are offering.

Cannon Rubber Manufacturers, Ashley Road, London N 17, who are again reserving their branded range of bottles for chemists only, offer a choice of 17 types.

This display stand supplied by Cannon Rubber Manufacturers provides accommodation for 40 hot water bottles

Child appeal is emphasised in a number of ranges. This Britmarine Nodland style is made by W. W. Heffenden

At the top end of their range, the Royal Scot and 888 have a soft rayon cover moulded onto the bottle. The 888 has a choice of three colours. Also strongly featured are their Velvetex, Fleur de Lys and Radiator.

In the standard range, from the Cannon Superb down to the 111, a choice of designs incorporates refinements like supple ribbing on one or both sides. Their Noah's Ark series has maintained its popularity with children and the familiar faces of the rabbit, bear, cat and dog are all in evidence again this year. In addition, there are the Babysafe and Cannon Cot.

P. B. Cow (Li Lo) Ltd, Trading Estate, Slough, continue to offer their comprehensive selection, including the Airflow models—Standard, Junior, Major and Double Heat.

Also featured are such individual styles as Sheerline, with its characteristic "streamlining," Apex, Diplomat, Embassy and Balmoral.

The Dunlop Co Ltd, Cambridge Street, Manchester, are again featuring their two luxury models, Cosimax and Deep Sleep, made by the "dipped" process in seamless latex, and provided with velvety-textured covers. Cosimax comes in fawn, cherry red, pink or blue and is designed to retail at 44s 6d, and Deep Sleep, a slightly smaller bottle, in primrose or cherry red, is recommended to sell at 36s 9d.

There are five types of moulded bottle in the range: Symbol comes in red, blue, green, lilac or gold; fluted Symbol in red blue or green; Flag in red or blue; and Renown, with a built-in handle, in lilac.

Two models have their own attached cover, Quilta, which comes in red or blue, and the children's Golliwog, in a choice of red, blue or yellow.

William Freeman & Co Ltd, Suba-Seal Works, Staincross, Barnsley, have reported considerable interest in their Coverlette styles and the recently-introduced, chemist-only Nu-Sun, Nu-Star and Nu-Ray.

Coverlette is a full-size No. 3 bottle covered in fast-dyed pile fabric, which, say Freemans, may be hand-washed or dry cleaned as required. It is available in tangerine or blue, with either screw stopper or anchored closure.

Nu-Sun is a classic-style bottle with heat-resistant plastic screw closure. Nu-Star has an over-all star stippled pattern, while Nu-Ray is ribbed on one side and plain on the reverse. All three are presented in high-clarity polythene bags carrying the slogan: "Buy a good hot water bottle . . . from your chemist."

The Britmarine range, manufactured by W. W. Haffenden Ltd, Sandwich, Kent, consists of 12 designs in four basic categories: luxury covered, ribbed, plain and children's.

In the first category, Slumberdeep-deluxe is a No. 3 size bottle with nylon quilted cover. In two colour-combinations, pink/white and blue/white, it is designed to retail at 17s 6d.

An example of the ribbed group is Warmwave with "safety fins" on both sides. It comes in red, pink and turquoise with matching polypropylene stopper. Cambridge, a representative of the plain

group, is available in the same colour choice as Warmwave.

Featured among children's bottles is Nodland, which carries a three-dimensional fairy tale scene. It is packed in individual display boxes and is available in pink or blue.

NPU Marketing Ltd, Mallinson House, Chase Road, London N 14, are again offering an extended range. Their De Luxe, retailing at 16s 6d, is covered in washable Terylene in zebra pattern of red/white or blue/white.

Petal is an unusual design which, say NPUM, makes a cover unnecessary—the soft, "petal-texture" ensuring even distribution of heat to the body. Described by the makers as "exceptional value for money" is Meteor, a large-size bottle with carrying handle, priced to retail at 8s 6d.

With space at a premium—as it is in most pharmacies—display of hot water bottles will be a major consideration in most premises.

Here, again, the manufacturers are providing strong support in the form of display stands. Just one of these is the Cannon unit illustrated on page 704. It accommodates 40 hot water bottles and also provides display space for the company's feeding bottles and other baby products. The stand is also adaptable to show a selection of other merchandise during the summer months.

We started this article by contrasting the pattern of demand in two successive years that had similar weather patterns in the important autumn period. But, whatever

the pattern, the net result remains the same over the years: hot water bottles not only retain their popularity, but continue to increase it. A clue to this growth may be contained in the remarks of one manufacturer contacted by the C&D:

"There is evidence that inflationary pressure on retail prices over a wide range of merchandise is creating a more selective purchasing attitude on the part of the public, who are assessing product value more critically this season. In this

The luxury look in hot water bottles featured by leading manufacturers is exemplified by this Cosimax model from Dunlop

respect, the hot water bottle continues to represent excellent value. While prices of individual bottles have risen, the rate of increase is, on the whole, below average level of increase for many other lines carried by the chemist.

"The hot water bottle is one of the few consumer products retailing for a few shillings which is engineered to an exacting specification, which must be completely safe in service, and which the consumer can expect to give satisfactory service for a minimum period of two years without loss of efficiency. Considering the substantial nationwide output of hot water bottles for the home market each year, it is a tribute to manufacturing standards that so very few complaints are received by the manufacturers from dissatisfied customers."

In conclusion, it may be helpful to list some of the pointers to the market as put to us by the suppliers:

☐ The market is divided about equally between the screw-closure models and the all-rubber, anchored closure types.

☐ There appears to be a growing public preference for ribbed bottles, and stockists would be well-advised to carry a selection of these—either ribbed on both sides or on one only.

☐ The public is becoming increasingly conscious of quality standards—hence the advisability of selling a product backed by a manufacturer's replacement guarantee, with some evidence of the standard to which the product is made, such as a British Standard specification.

ECONOMICS OF A BUSINESS THAT CAN ATTRACT THE YOUNG PHARMACIST

By H. B. Coulson

The word "economics" is derived from two Greek words meaning house-keeping. It involves the ideas of making the best use of available, but of necessity limited, resources; of a need for priorities to differentiate between essentials and non-essentials, and of the need to deal with the realities of a situation which are beyond one's personal control.

The situation that I want to consider is that of a comparatively young pharmacist who has had some years of management, when his salary will have reached something in excess of £2,000 pa, but he now wants to go into business on his own account. He will have to invest capital most of which he will have to borrow so he will want a return in excess of what he will have to pay, or that his own money could earn invested. He will also want a return for what is called his entrepreneurial activity, ie, the risks that he takes and the effort that he puts into the business.

With regard to a loan, his best source, if he can comply with the conditions, is the NPU Business Purchase and Guarantee Fund when he will pay 7½ per cent on money actually borrowed. A bank will charge 9 to 10 per cent, and other sources more, even up to rates which work out to 15 per cent or more for the whole amount for the whole period of the loan.

We calculate that the return necessary to meet these requirements is £3,850 per annum, and to provide it a business with an annual turnover of £27,500 is needed. Such a business will have stock valued at about £5,000, and will probably cost in all between £9,000 and £10,000.

Now this, I submit, is very important because it represents the smallest business which can be considered as freely saleable on the open market. I do not say that this is the smallest saleable business, but I do say that to be saleable a smaller business will need the potentiality to reach an annual turnover of £27,500 in two or three years, or else some special feature which will make it attractive to a particular buyer, but may leave its potentiality for re-sale doubtful.

Let me here make three points. First that about eighteen months ago the Chemists' Action Group were advocating that the notional salary of a proprietor pharmacist should be £4,000 pa. If by this they meant that the lowest appropriate net profit on trading to a proprietor pharmacist is £4,000 pa, you will see that the NPU entirely agree subject to the qualification that the pharmacy itself must be a viable enterprise. This, however, is not

the notional salary of a proprietor pharmacist for NHS computations.

Second, the idea of a planned pharmaceutical service is being much discussed. Desirable as this is, present legislation and present political climate do not cause much optimism at present, but the figure of £27,500 annual turnover as a minimum unit is a useful figure, and if the new proprietors look for a minimum income of £4,000 per annum this will go a long way toward achieving the desired distribution of pharmacies.

Third, any further rise in expenses will raise the size of the minimum viable pharmacy.

Now we need to know what we can about such a pharmacy, in particular of what will its turnover be made up, and what population it will serve.

There are various sources of information of which the most important is the Census of Retail Distribution, showing the spendings of the population and how it is divided up. Of total spendings on the lines sold in pharmacies some of the money will be spent in shops other than pharmacies, for example toilet products in general stores, and a substantial amount of the money spent in pharmacies will be spent with multiples or co-operative society pharmacies. Consequently the total amounts spent have to be divided between these groups. The computations are fairly intricate, but on the best computation that I can make an average person will spend with a private pharmacy annually the amounts shown in the table in column 3.

Here note two very important things. First that beyond providing an efficient and courteous service you can do nothing to increase your NHS turnover; and likewise all are agreed that it is against public interest to attempt to sell to the public medicines in excess of their needs.

Distance between pharmacies	Population served	Expected turnover	Estimated income of owner-manager
0·85 mile	4,200	£27,500	£3,850
1 mile	5,000	£32,500	£4,500
1½ mile	6,000	£39,000	£5,200
1¾ mile	7,400	£48,000	£6,200
1·4 miles	10,000	£65,000	£7,700

According to some figures published by Nielsen in the early part of the year, these seem to be about the highest practical figures, but if we go to double the distance apart from the smallest viable business we get			
1¾ miles	15,000	£11,0000	£9,900

Therefore the only scope for increase in a pharmacy is in the category of "other counter sales." Second that your very liberty, by which I mean your ability to resist any decisions of the Government which bear too hardly on pharmacy, is dependent on the counter sales — chiefly non-pharmaceutical.

I know well how pharmacists, and particularly the younger generation, feel very strongly that they wish to earn their living by the practice of their profession, and I have the greatest sympathy. But it is a hard fact that historically the British public have always been used to subsidised medicine, and any other condition will be immensely difficult to create and will come about very slowly.

It is simple to calculate the number of people each spending £6 10s pa required to produce a turnover of £27,500.

The answer is about 4,200. Therefore we arrive at the proposition that the smallest viable pharmacy today needs to be supported by a population of 4,200. And this leads on to the question "what sort of area in an urban district would 4,200 people inhabit?"

With the help of the authorities at the Cambridgeshire County Council I was able to ascertain the urban areas and populations of the principle towns in East Anglia. The average population turned out to be 7,400 per square mile. Which means that 4,200 would occupy 0·57, or roughly 0·6 of a square mile.

How you determine the shape of the area served by a pharmacy is anybody's guess. Some more obvious choices are a square, a circle, or a segment of a circle. I chose a circle, and decided that perhaps the circles might overlap a little to allow for the areas that would be

NHS	55·7s
Other drugs	22·4s
Cosmetics & toilet preparations	37·6s
Photographic goods	11·2s
Total	126·9s

For further calculations I have rounded this down conservatively to £6 10s pa. In percentages the turnover will consist of

NHS	44
Counter sales of medicines and appliances	17
Other counter sales	39

cluded if adjacent circles only touched each other. Everybody knows that the area of a circle is πr^2 and hence the radius of a circle enclosing 0.57 square miles is 0.425 miles, so that pharmacies of this size would be 0.85 miles apart, and everyone would be well less than a mile from the nearest pharmacy.

I think it is fair to assume that the density of urban population in East Anglia is about the same as in other parts of the country except that in some working class areas the density may be higher, but possibly the spending power is less, so the area served is perhaps about the same.

If we project the figures we get an interesting table (see foot of opposite page). Now let us note first of all that because the area varies as the square of the radius of the circle, a small increase in distance apart has a profound effect on turnover and profitability.

Then, 4,200 being six tenths of 7,000, a pharmacy catering for 7,000 population, which would normally have a turnover of £45,500, would have a turnover of minimum viability if it confined its activities to dispensing and the sale of medicines only. In this connection we should recall the Court's statement in the RPM judgement on the desirability of preserving pharmacies of a turnover of £25,000 if possible, and the paragraph which states "We consider that the ease of access to a chemist's shop is a matter of public importance, particularly having regard to the fact that many members of the public who make use of a chemist's shop are old, infirm or mothers of young children. A plentiful and well distributed supply of such shops is therefore desirable."

We all agree that everything possible should be done to limit the sale of medicines to pharmacies but we must recognise that the further apart that pharmacies are situated the greater will be the public pressure for an extended general sales list. It is anything but certain that in present circumstances pharmacies situated 1½ miles apart would have the same proportion of over-the-counter sales of drugs as pharmacies situated a mile apart. It might well be that the public would in fact buy a higher proportion of their medicines from more conveniently-placed grocers.

We may say, then, that to remain viable, pharmacies with turnovers of under £45,000 must depend to some extent on sales other than those of dispensing and medicines, and that Mr Justice Buckley considers it in the public interest that pharmacies should be of this type, ie, not exclusively professional. And if we admit this, then surely we must go a step farther and agree that if we are selling non-medicinal goods for which there is price competition in other types of businesses, there is nothing unethical in meeting this competition if economically we are able to do so. Indeed we are doing no more than endeavouring to provide the public with a professional service at a price that it will pay for it.

We may go just one step further, with-

out making too confusing qualifications. If a business serving 4,200 people does 43 per cent of its turnover in NHS a business serving about 10,000 people could do the same turnover in NHS dispensing only, and such pharmacies (of normal turnover £65,000) would be situated less than 1½ miles apart, and would, incidentally, be ripe for nationalisation.

What is the NPU doing about all of this?

First, we recognise that the situation exists. We recognise on the one hand the economic value of the training and knowledge required of a pharmacist, in addition to the salaries of unqualified staff, and the general level of overheads sets a lower limit to the size of a viable pharmacy, and on the other hand that a plentiful and well distributed supply of such businesses is desirable in the public interest.

The size of the smallest viable business is constantly growing. It is becoming more and more difficult for a young pharmacist to become a proprietor. This situation was foreseen years ago at the time of the setting up of the NPU Business Purchase and Guarantee Fund. Today it is more important than ever. Every young would-be proprietor should have a minimum of £250 invested in it. It is his best possible investment. Every owner of a sizeable pharmacy which he may one day want to sell should have a minimum of £100 invested as an aid to the financing of the sale, in addition to the furtherance of the ideal of keeping good pharmacies in private hands.

The public have given clear proof of their preference to shop in bright modern style shops. The NPU shop modernisation department is at members' service to advise on the modernisation of shops.

The NPU staff training scheme and the Pharmacy Assistants' Training Board with the setting up of the two new City & Guilds examination for dispensary technicians, and counter assistants are designed to give real force to our contention that there is a genuine difference between the purchasing of medicines at a pharmacy and at any other shop.

The NPU Marketing operation is designed to mobilise the purchasing power of members to enable them to meet the bitter high street competition. We admit that we have met with unexpected teething troubles. Chiefly, I think, due to manufacturers and wholesalers underestimating the level of demand, but it is tremendously important that members give it their strong and continued support to make it work, and let suppliers be aware of their determination to do so.

The inter-firm comparison scheme which has got off to a flying start will produce more and more information to help you to run your own businesses in the most efficient way, and us to operate to bring about the increased profitability of the independent retail pharmacy as a whole—and that is our objective!

Mr Coulson, who is the NPU treasurer, gave this paper last week at an area meeting of the Union in Cambridge.

COMING EVENTS

Monday November 16

Aberdeen Branch, National Pharmaceutical Union, Scottish Pharmaceutical Federation, Treetops hotel, Springfield Road, Aberdeen, at 8 pm. Mr C. C. Green on "The rpm case, the judgment and the future."

Nottingham Branch, Pharmaceutical Society, 64 St. James's Street, at 8 pm. Mr Barrie Thompson on "Professional commercialism."

Tuesday November 17

Cardiff Branch, National Pharmaceutical Union, Park hotel, Cardiff, at 8 pm. Mr E. J. Downing, on "Security in pharmacy management."

Epsom and Sutton Branch, Pharmaceutical Society, Bourne Hall, Ewell, at 8 pm. Dr M. P. Earles on "The Origins of the therapeutic revolution."

Leeds Branch, Pharmaceutical Society, Great Northern hotel, Leeds, at 8 pm. Mr C. Hetherington on "Clinical pharmacy in the USA."

Perth Branch, National Pharmaceutical Union, Scottish Pharmaceutical Federation, Royal George hotel, Tay Street, Perth, at 7.45 pm. Mr C. C. Green on "The rpm case, the judgment and the future."

Sheffield Branch, Pharmaceutical Society, Royal Victoria Hotel, Sheffield, at 8 pm. Mr J. P. Kerr on "Matters of moment."

South East Wales Branch, National Pharmaceutical Union, Treforest Restaurant, Treforest Industrial Estate, Pontypridd, at 7.45 pm. Mr Aubrey Davies on "Wine-Making."

West Kent Branch, Pharmaceutical Society, The Wellcome Research Laboratories, Langley Court, Beckenham, at 8 pm. Professor A. H. Beckett, on "The problem of dope in society and sport and some methods of its control."

Worthing and West Sussex Branch Pharmaceutical Society, Cricketers hotel, Broadwater, Worthing at 8 pm. Open forum.

Wednesday November 18

Bournemouth Branch, Pharmaceutical Society, Anglo-Swiss hotel, East Cliff, Bournemouth at 8.30 pm. Professional dinner. Dr G. Sedman and Dr P. Watson on "Drugs . . . Use, Mis-use and Abuse."

Glasgow Regional Branch, National Pharmaceutical Union, Scottish Pharmaceutical Federation, Trades House of Glasgow, 85 Glassford Street, Glasgow Cl, at 7.30 pm. Mr C. C. Green on "The rpm case, the judgment and the future."

Thursday November 19

Bedfordshire Branch, Pharmaceutical Society, Red Lion hotel, Deadmans Cross, at 8 pm. Debate on the pharmacist's responsibility.

Doncaster Branch, Pharmaceutical Society, Punch's hotel, Doncaster, at 8 pm. Film: "On flows the river."

Edinburgh Branch National Pharmaceutical Union/Scottish Pharmaceutical Federation, Roxburghe hotel, Charlotte Square, Edinburgh, at 7.30 pm. Mr C. C. Green on "The rpm case the judgment and the future."

Lancaster, Morecambe & Westmorland Branch, Pharmaceutical Society, Clarendon hotel, West End, Morecambe, at 8 pm. Speaker: Mr L. M. McGrath, Superintendent, Preston Prescription Pricing Bureau.

Manchester and Salford Branch, Pharmaceutical Society, Boyd House, Upper Park Road, Victoria Park, at 8 pm. Mr C. C. Stevens on "The effect of legislation on careers in pharmacy."

THE WORKING PARTY ASKS THE QUESTIONS

The Working Party on NHS General Pharmaceutical Services has produced a memorandum of guidance for persons submitting evidence (see p 681).

The terms of reference of the Working Party are:

To consider, in the light of the proposed reorganisation of the administrative structure of the health service in England and Wales, all aspects of the involvement of pharmacists in general practice in the National Health Service, and to submit a report to the Central NHS (Chemist Contractors) Committee.

It is extremely important that evidence should follow the order set out below. Adherence to this general rule will help the Working Party to make a full assessment of your proposals with the minimum of delay.

General principles

The Working Party proposes to be guided by the following general principles:

☐ At all levels in the Service, decisions upon professional matters, whether in administration or in day-to-day practice, should be taken by pharmacists or on the advice of pharmacists.

☐ Pharmacists must be assured of the maximum possible amount of professional freedom in their day-to-day work. Where it is desired to secure the adoption of standard practices they should so far as possible always be introduced in the form of advice from authoritative pharmaceutical sources.

☐ Professional discipline in relation to both conduct and work should be imposed through tribunals on which pharmacists are adequately represented.

1. The existing contract between the Executive Councils for the Part IV Pharmaceutical Services

The existing contract is between the Executive Council and the proprietor of a pharmacy. The "proprietor" may be a pharmacist, a partnership all the members of which are pharmacists, or a limited liability company registered in accordance with the provisions of the Pharmacy Acts.

The basis of NHS remuneration is that the overall amount due to be paid in respect of the prescriptions dispensed consists of the sum of the following items:

☐ Cost of materials (i) drugs, dressings and appliances ("net ingredient cost"); (ii) containers etc

☐ Cost of labour, eg, salaries, proprietor's notional salary and SET

☐ Cost of overhead expenses, eg, rent, rates, light and heat

☐ Profit

Thus, remuneration is made up of three cost elements, plus a fourth negotiable element, profit (ie, profit per prescription). Part of the labour element, the *proprietor's notional salary*, is also negotiable.

Apart from this, all the costs under the headings of labour, overheads and containers, are actual costs ascertained from specific cost inquiries carried out on a statistical sample of pharmacies selected to be representative of all chemist contractors.

The net ingredient cost is subject to a deduction by an amount calculated to take account of the discounts available to chemists. This is to comply with the chemist contractor's Terms of Service, part of which says that the ingredient costs paid by the Department of Health shall be a reimbursement of the *actual* cost paid. An inquiry into the amounts being received in discounts by chemist contractors in England and Wales resulted in the reaching of a settlement in 1964 which included the proviso that the total net ingredient cost would be discounted "on a scale determined by the Secretary of State after consultation with the Central NHS (Chemist Contractors) Committee, starting at one-tenth of one per cent and rising to 3.5 per cent where 7,001 or more NHS prescriptions have been dispensed in the month."

Method of payment

Because it is not practicable to make frequent changes to the rate at which pharmacists are reimbursed, a rate is determined which can be maintained for a reasonable period. Once the rate has been agreed between the Central NHS (Chemist Contractors) Committee and the Department of Health and Social Security, it is paid to pharmacies in two parts. First, by means of a *professional fee* in respect of every prescription dispensed and, secondly, by an *on-cost* payment calculated as a stated percentage of the *net ingredient cost* of the prescription. Each of these two parts of the payment, fee and on-cost, includes an amount calculated to provide the agreed value of the profit.

Questions

☐ Do you consider that the present arrangements provide a satisfactory basis of remuneration for dispensing NHS prescriptions?

☐ If you reject the present basis, what scheme would you propose as an alternative for determining the contractor's remuneration, having regard to the involvement of items such as establishment charges, cost of drugs, salary of proprietor and staff, and return on capital?

☐ Justification for the figures in the present system depends, as explained above, almost wholly on the analysis of the actual experience of a selected group of businesses. Have you alternative suggestions for obtaining the necessary basis statistics?

☐ If on-cost is to be an item in the contract, what items should be included in its calculation? Do you consider that percentage of on-cost should vary with the number of prescriptions dispensed?

☐ What other criticisms have you to offer of (i) the way the present scale of remuneration is calculated and (ii) the financial result of the calculation?

☐ Have you an alternative scheme to propose? Can you provide figures in support of it? Or suggest means of obtaining them?

2. The Constitution of the Central NHS (Chemist Contractors) Committee

The Central NHS Committee is a body representative of all types of chemist contractors. Membership of the Committee is as follows: 11 "private contractor" representatives appointed by the NPU Executive Committee; two representatives appointed by the Company Chemists Association Ltd; one representative appointed by the Co-operative Union Ltd; the secretary and registrar of the Pharmaceutical Society of Great Britain attends all meetings as an observer.

Question

☐ Have you any comments to offer on the constitution of the Central NHS Committee?

The Working Party finally sets out questions to be answered on other matters.

3. The Scope of the Pharmacist's Responsibility

☐ Is there any work done by the pharmacist and his staff, not connected with the dispensing of NHS prescriptions but which benefits the health service as a whole, for which remuneration is not received at present but, in your opinion, should be? If so, please give details together with suggestions of the basis on which you consider payment should be made.

☐ Are there any other services in the health field which you consider could be undertaken in pharmacies, eg, a closer involvement in preventive medicine and health education. If so, please give details together with suggestions of the basis on which you consider payment should be made.

☐ Are there any obligations at present imposed on pharmacists in the NHS which you consider unduly onerous or unnecessary?

☐ (i) Have you any views on the necessity for a drug-testing scheme? (ii) And on the operation of the current scheme? (iii) Does the NHS disciplinary machinery provide fair opportunities for the contractor to make out his defence? (iv) Should a pharmacist manager or assistant pharmacist always be made a party to any complaint about events in premises where he is engaged?

4. The organisation of the Service

☐ The last Green Paper on the proposed reorganisation of the administrative structure of the NHS envisaged unification of the existing tripartite structure and administration of all health, as distinct from social and welfare, services by Area Health Authorities. In each area a Committee would be established by statute

Continued on p 712

Continued from p. 711

to replace the Executive Council and be responsible to the Area Health Authority for the general medical, pharmaceutical, dental and ophthalmic services.

Assuming that all pharmaceutical services will be the responsibility of a committee of pharmacists to replace the existing Local Pharmaceutical Committee, have you any comments to make on the composition and functions of Pharmaceutical Committees and Service Committees?

☐ Have you any comments to make on the functioning of the Pricing Bureau, and the checks on pricing carried out by the Central Checking Bureau at Mallinson House?

☐ Do you feel there is adequate transmission of information about the service between the Department and the Pharmacy, through Executive Councils? If not, what suggestions have you for improvements?

5. Economic Position of General Practice Pharmacy

☐ Have you any comments on the current economic situation which are relevant to the NHS contract?

6. Health Centres

☐ Have you comments upon methods by which the pharmaceutical service in an area served by a health centre can be provided (inside or outside the centre) by local general practice pharmacists? Or other views about the provision of a pharmaceutical service in a health centre?

7. Improvements of the Pharmaceutical Service

☐ Have you any suggestions for improvement of the pharmaceutical service given under the NHS (other than the terms of the contract) from the point of view of (a) the public, (b) the pharmacist, (c) the prescriber, (d) the Minister?

8. Other Matters

☐ Please deal with any other matters upon which you have opinions to submit.

A copy of the memorandum will be sent to those who notify their intention to submit evidence. The address is the Joint Secretary, Working Party on NHS General Pharmaceutical Services, 17 Bloomsbury Square, London WC1A 2NN.

MARKET NEWS

Higher citrate prices

London, November 11: Higher citrate prices are now in operation following a recent jump in citric acid rates by between £26 and £30 a metric ton. New schedules are also operating for tartaric acid, sodium potassium tartrate and some gluconates.

In crude drugs trading still remains in the doldrums but prices continue to harden on reports of scarcities at origin. Copaiba and Peru balsams were dearer; gentian root and white squill advanced by 10s cwt, Matto Grosso ipecacuanha by 2s 6d lb, but styrax eased by sixpence lb and camphor powder by 1s 6d kg for forward delivery. Cochineal remained difficult only the black-brilliant being quoted for shipment.

The honey famine

At this time of year Australian honey shipments are normally at their peak but this year scarcely anything is being sent. Any orders that have been accepted are for much smaller quantities than required and are for January shipment which means March before they arrive. As mentioned in a previous report there are no supplies from either China or Mexico to fall back on. Hardest hit are the manufacturers for it is the cheaper and darker grades which they favour most, that are unobtainable.

Among essential oils both Chinese and Ceylon citronellas were dearer by three-pence lb. Camphor white lemongrass and palmarosa were easier.

Pharmaceutical chemicals

Calcium gluconate: (Per metric ton) 25-kg lots £550; 250-kg £500.

Citric acid: BP granular (single deliveries per 1,000 kg in lined bags), 50-kg £306; 250-kg £295; 1,000-kg £284. Premiums; anhydrous £18; powder £10 per 1,000 kg.

Emetine: hydrochloride £450 kg;—bismuth iodide £212 10s.

Ephedrine: (25-kg per kg) alkaloid 232s 9d; hydrochloride 185s; sulphate 190s.

Ergometrine maleate: (Per g) 5g 144s; 10g 138s

Ferrous gluconate: (Per metric ton) 25-kg £600; 250-1,000 kg £554.

Ferrous phosphate: In kegs 9s 2d kg.

Homatropine: (500-g) Alkaloid 1,182s kg, hydrobromide 935s; hydrochloride 1,106s; methylbromide 973s; sulphate 1,145s.

Hydrogen peroxide: 27.5 per cent. £113 3s; 35 per cent. £135 16s per 1000-kg in 50-kg containers.

Kaolin: Light, 500-kg 1s 3d kg; 1,000-kg 1s 2d kg.

Mercurochrome: 145s per kg.

Piperazine: Under 50 kg; adipate 19s 3d kg; citrate 18s 6d; hexahydrate 13s 3d; phosphate 20s. 6d, tartrate 19s 6d.

Potassium acid tartrate: (Per metric ton) 50 kg £399; 250-kg £391; 1,000-kg £381.

Potassium citrate: £326 per metric ton.

Quinidine: sulphate 21s 8d per oz for 1,000-oz lots. Alkaloid 17s oz (500-oz).

Quinine: In 25-kg lots (per kg) sulphate 402s 7d; hydrochloride 469s 9d; bisulphate 405s 8d; dihydrochloride and alkaloid 504s 11d; hydrobromide (14 kg lots) 549s 8d.

Sodium citrate: £293 per metric ton.

Sodium potassium tartrate: (Per metric ton) 50-kg £287; 250-kg £282; 1,000 kg £278.

Sodium salicylate: 1000-kg lots 10s kg. sodium salt BP 14s.

Tartaric acid: (Per metric ton) 50-kg £422; 250-kg £417; 1,000 kg £408.

Theophylline: (50-kg) BP anhydrous hydrate and ethylenediamine (aminophylline) 41s kg.

Zinc chloride BPC 1959 sticks 23s 4d per kg. granular £125 metric ton.

Zinc peroxide: 1-cwt lots of BP 1953, 5s 3d per lb.

Zinc sulphate: monohydrate £58 per 1,000 kg heptahydrate £35.

Zinc carbonate: BPC 25-kg sacks 5s 2d kg.

Crude drugs

Balsams: (Per lb) **Canada:** 36s 6d spot; shipment new crop 36s cif. **Copaiba:** BPC 12s; Para soluble 8s spot. **Peru** 21s spot, 20s 6d, cif. **Tolu:** BP 14s.

Camphor: BP powder 35s kg spot; 27s 6d, cif.

Cochineal: Tenerife black-brilliant 65s lb, cif.

Gentian: Root 420s per cwt spot; 410s, cif.

Gums: (Per cwt) **Acacia:** Kordofan cleaned sorts 290s spot; 275s cif. **Karaya:** No. 2 faq 460s spot; 440s cif. **Tragacanth:** No. 1 spot £300 No. 2 £275.

Honey: (Per cwt ex store). Australian light amber 162s 6d, medium amber 142s 6d, nominal, Argentinian 185s nominal, Canadian 220s, Mexican 215s, nominal, Chinese 147s 6d nominal.

Ipecacuanha: Matto Grosso 67s 6d lb spot; 65s, cif. Costa Rican, spot 64s; shipment 62s 6d, cif.

Menthol: (lb) Chinese spot 66s; shipment 60s, cif. Brazilian 39s 6d spot; 38s 9d, cif.

Seeds: (Per cwt) **Anise:** Star 165s Spanish green 245s; 233s, cif. **Caraway:** Dutch 190s, cif. **Celery:** Indian 345s, cif; 400s spot. **Coriander:** Moroccan 80s 6d cif. **Cumin:** Moroccan 255s, cif; Iranian 300s spot. **Dill:** (per 50-kg) Chinese 117s, cif; 140s duty paid. **Fennel:** (50 kg) Chinese 107s 6d spot; 100s, cif. **Fenugreek:** Moroccan 75s duty paid, 57s 6d, cif. **Mustard:** English 60s to 120s as to quality.

Squill: White spot 250s cwt; shipment 230s, cif.

Styrax: Spot 24s lb; 23s 6d, cif.

Essential oils

Anise: Chinese 14s lb spot; 13s 3d, cif.

Camphor, white: 6s 6d kg, spot; 6s 3d cif.

Citronella: Ceylon 7s 3d lb spot; 7s 2d, cif. Chinese 10s 1d spot, 10s 3d, cif.

Lemongrass: 46s per kg spot; 42s, cif.

Palmarosa: 195s kg spot; 165s, cif.

ROCHE**PRODUCTION PHARMACIST**

(Tabletting)

There is a vacancy in the tabletting section of our Pharmaceutical Production Department at Welwyn Garden City, Hertfordshire, for a production pharmacist. The successful candidate for this new post will be a man who is able to demonstrate successful experience based on a very sound professional training (MPS/B.Pharm/BSc) and gained during at least three years' working in an industrial tabletting environment.

The preferred age-range is 25 to 35 but older candidates should not feel deterred from applying.

Pharmaceutical production at Welwyn continues to expand rapidly, and there will be ample scope — once he has mastered his routine responsibilities — for the man who is appointed to initiate and carry through innovations in production technique.

Salary and other conditions of service will be competitive. Please write (briefly) for a confidential record form and for information about Roche to the Staff Officer at:

ROCHE PRODUCTS LIMITED,
15 MANCHESTER SQUARE, LONDON W1M 6AP

GIBRALTAR**CHIEF
PHARMACIST**

Required on contract of two years in the first instance to take charge of Dispensary, issuing medicines to 200 in-patients, certain classes of out patients, and district. DREWERY F. BUNKALL
Clerk of the Council

Town Hall,
Northfleet.

Ask your Chemist for Carresin says the Nurse

But will he have it? asks Dr Crowther

With fourteen letters in the morning post all saying "My chemist has no Carresin" Sales Director Ken Rivers was feeling desperate. Every chemist in the country has been told about Carresin — every wholesaler given details. Nurses and Health Visitors are giving the new mother excellent working samples and telling them to "get it from your Chemist".

* He carefully chose an antique Dutch flintlock made by Leonard Graeff and having silver mounted ivory stocks terminating in a silver helmet.

Carresin is a "chemists only" line — and here is the only sales channel blocked. In despair Ken reached for his gun* "Stop Ken!" we cried. "Tell the chemists once more about Carresin". Looking the pharmaceutical profession keenly in the eye Ken said "We don't want you to order a couple of gross of Carresin—but please put three bottles on your shelves from the wholesaler!"

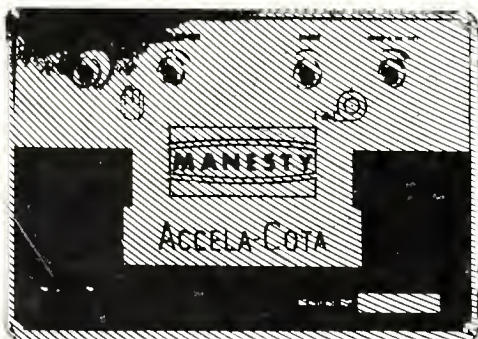

New mothers WANT Carresin for use at nappy change—to control bowel bacteria on the skin (those which cause gastro-enteritis) to prevent nappy rash, to remove bowel soil. Don't you feel that you owe it to your customers—the new mothers—to have Carresin when they ask for it?
